Highlights

Barracuda CloudGen Firewall 7.2 is now generally available and introduces a sophisticated set of new features and options to secure on-premises-, hybrid-, and cloud network-infrastructures.
The highlights include Virtual Routing and Forwarding, SSL Inspection Policies, support for Barracuda Reporting Server, Volume-Based Cloud Billing, Control Center support for Google Cloud Platform, and many more.
Check out the full version history from 7.2.0 to 7.2.2 to see what you get when upgrading to the 7.2.2 GA version of the Barracuda CloudGen Firewall.
