What's New in Barracuda Campus, September 2018

https://campus.barracuda.com/doc/78154266/

September 2018

The Barracuda Campus newsletter is updated monthly with a listing of new and updated articles by product. The **Highlights** section announces new product documentation and other major additions or updates to the Barracuda Campus. Check back each month for the latest and greatest!

Please direct feedback and questions to:

- campus@barracuda.com for account, login, and classes
- documentation@barracuda.com for documentation

Choose Your Product

Highlights

- New product! Barracuda Content Shield is now generally available and delivers a powerful web threat protection and content filtering solution for MSPs. Barracuda Content Shield protects users from malicious sites and inappropriate content in a cloud-based solution, including the following key features;
  - Web security and content filtering configured and managed in the cloud
  - Blocks malicious sites before a connection is established, on all devices in the network
  - Helps enforce customers' company policies by restricting inappropriate web browsing
  - Offers customizable protection levels and templates that can be reused
- Barracuda CloudGen Firewall version 7.1.4 is now available! Read the Release Notes.
- The Barracuda Backup Campus space has been redesigned into a logical flow of content, rather than individual solutions
- Barracuda Cloud-to-Cloud Backup now has its own space
