

Microsoft Hyper-V Recovery

<https://campus.barracuda.com/doc/78155623/>

For Microsoft Hyper-V, Barracuda Backup leverages the Barracuda Backup Agent for Windows to perform image-level backup and recovery of Hyper-V virtual machines (VMs). VMs can be recovered back to the original host, as well as any other host; whether or not it was backed up previously with Barracuda Backup.

The following types of recovery can be performed for Microsoft Hyper-V virtual machines:

- Entire VM recovery
- VM disk download
- File and folder download (LiveBrowse)
- Cloud VM recovery (Cloud LiveBoot)
