

Data Archival

<https://campus.barracuda.com/doc/78155641/>

Archive data for long-term retention for future reference using the following tools:

- Backup Export Tool – Use the Backup Export Tool to export backup data to external media for long-term archival or for compliance reasons.
- Offsite Vaulting – Barracuda Backup offsite vaulting allows you to archive up to 12 monthly and 7 yearly historical revisions to a supported offsite destination while deleting unneeded portions of these revisions from the local appliance. This allows you to retain long-term archival data while freeing up disk space on the appliance.
