Protecting Microsoft Exchange

https://campus.barracuda.com/doc/78156835/

Barracuda Backup follows the lifecycle policy of each supported vendor and does not support versions that are end of life or end of support as indicated by the product vendor.

There are two methods for protecting Microsoft Exchange with Barracuda Backup; using the Barracuda Backup Agent to protect the entire server and databases and using the Exchange Message-Level backup to backup individual email messages and folder structure, enabling granular Exchange recovery.

In this Section

- Microsoft Exchange Server and Databases
- Exchange Message-Level Backup
