# Protecting Non-Microsoft Applications

https://campus.barracuda.com/doc/78156843/

Barracuda Backup follows the lifecycle policy of each supported vendor and does not support versions that are end of life or end of support as indicated by the product vendor.

While the Barracuda Backup Agent for Windows and Linux do not detect the presence of non-Microsoft applications, by using native backup tools or creating dump files, Barracuda Backup can protect non-Microsoft applications. The following sections explain how a backup can be configured for certain non-Microsoft applications levering the Barracuda Backup Agent.

## In this Section

- Protecting MySQL Databases
- Protecting Oracle Databases
- Protecting Barracuda Message Archiver
