

Protecting Non-Microsoft Applications

While the Barracuda Backup Agent for Windows and Linux do not detect the presence of non-Microsoft applications, by using native backup tools or creating dump files, Barracuda Backup can protect non-Microsoft applications. The following sections explain how a backup can be configured for certain non-Microsoft applications leveraging the Barracuda Backup Agent.

In this Section

- [Protecting MySQL Databases](#)
- [Protecting Oracle Databases](#)
- [Protecting Barracuda Message Archiver](#)
