

Understanding the Barracuda Backup Vx

<https://campus.barracuda.com/doc/78156936/>

The Barracuda Backup Vx is a pre-configured, software-based virtual appliance that provides comparable functionality to the Barracuda Backup physical appliance:

- The Barracuda Backup Vx allows customers to deploy the Barracuda Backup product on their own infrastructure using their own storage;
- The Barracuda Backup Vx is licensed per CPU socket or physical server as an annual subscription with no upfront hardware costs;
- The Barracuda Vx helps fully virtualized customers more effectively use and deploy Barracuda Backup to protect their virtual environment without deploying a physical appliance.
