## Release Notes

<https://campus.barracuda.com/doc/78808494/>

### December 20, 2021

---

#### Feature

- Updated navigation to better reflect the name and logo for Barracuda Content Shield. [BCC-3454]

### December 14, 2021

---

#### Fixes

- Fixed an issue where a new user could be redirected too many times during signup. [BCC-3398]
- Fixed an issue where a user login would fail if they had no time zone set. [BCC-3381]

### December 4, 2021

---

#### Feature

- Added new product logos to the Cloud Control product switcher (used by some Barracuda products). [BCC-3395]

### November 11, 2021

---

#### Fix

- Fixed errors in long-running directory syncs. [BCC-3235]

### October 26, 2021

---

#### Fix

- Fixed an error that occurred when a logged-on user was not associated with a default account.

[BCC-2490]

## **October 19, 2021**

---

### **Feature**

- When a login to Barracuda Cloud Control fails, the login form will now display a "contact support" link. [BCC-3265]

## **September 15, 2021**

---

### **Feature**

- Removed the link to the Barracuda Secured21 conference. [BCC-3254]

## **August 31, 2021**

---

### **Feature**

- Performance improvements. [BCC-3233]

## **August 24, 2021**

---

### **Feature**

- Notification banners displayed in the Cloud Control user interface are now dismissible by users. [BCC-3209]

## **August 18, 2021**

---

### **Fix**

- Fixed errors in directory sync process. [BCC-3135]

---

## July 27, 2021

---

### Feature

- Adding a link for Barracuda Secured21 conference (removed post conference). [BCC-3181]

---

## July 26, 2021

---

### Feature

- Adding a link for Barracuda Secured21 conference (removed post conference). [BCC-3181]

---

## July 6, 2021

---

### Fix

- Various PHP Errors Leading to 500s During User Signup Flow. [BCC-3164]

---

## June 2, 2021

---

### Features

- Access to product demos has been removed from Barracuda Cloud Control. Barracuda Partners/Resellers can access product demos from the Partner Portal. [BCC-2962]
- Added Internationalization support for error messages seen during authentication to Barracuda Cloud Control. [BCC-2596]

### Fixes

- Resolved an issue where new user creation in Barracuda Cloud Control was intermittently failing, causing the error message stating "Failed to finish authentication with Microsoft. Please try again.". [BCC-1]

### Known Issues

- Sorting groups by privileges results in 504 error. [BCC-3151]
- **AuthDB** - The GET environment/sync\_status API currently\_syncing response is never true. [BCC-3119]

---

## May 18, 2021

---

### Feature

- Barracuda CloudGen Access now opens in a new browser tab. [BCC-2933]

## April 6, 2021

---

### Feature

- The user experience for a new user/account creation process as part of the Barracuda Cloud Control login page has been updated. [BCC-2551]

## March 10, 2021

---

### Feature

- Barracuda CloudGen Access is now accessible from the Barracuda Cloud Control left-hand navigation menu. CloudGen Access brings Zero Trust/BeyondCorp Security to your endpoint. Implement secure access to enterprise resources, whether they are on-premises or in the cloud, with a quick and easy configuration process. [BCC-2881]

### Fix

- Resolved an issue where new user creation in Barracuda Cloud Control was intermittently failing, causing the error message stating "Failed to finish authentication with Microsoft. Please try again.". [BCC-1]

## February 10, 2021

---

### Feature

- Added Internationalization support for error messages seen during authentication to Barracuda Cloud Control. [BCC-2596]

### Fixes

- The **Partner** tab is correctly being displayed. [BCC-2837]

- Resolved an issue where new user creation in Barracuda Cloud Control was intermittently failing, causing the error message stating "Failed to finish authentication with Microsoft. Please try again.". [BCC-1]
- The **Directories** page lists the correct number of domain. Previously, listed only a maximum of 100 domains, even if there were more than 100 domains synced in the Directory. [BCC-2]

---

## January 19, 2021

### Fix

- Resolved an issue where new user creation in Barracuda Cloud Control was intermittently failing, causing the error message stating "Failed to finish authentication with Microsoft. Please try again.". [BCC-1]

---

## January 18, 2021

### Enhancements

- Enhancements to the Barracuda Cloud Control login user experience, which includes a new password strength indicator, MFA configuration dialog, Caps lock indicator, and improved error messaging.

### Features

- **Barracuda Cloud-to-Cloud Backup Version 3** is now available for new customers in Barracuda Cloud Control! Cloud-to-Cloud Backup is now visible in the Barracuda Cloud Control (BCC) product switcher as its own service, decoupled from Backup. Cloud-to-Cloud Backup also has its own entitlement in BCC. Barracuda Cloud-to-Cloud Backup Version 3 offers:
  - New massively scalable cloud native platform
    - Cloud-scaled resiliency and scalability
    - In cloud faster backup and restore performance
  - Simplified user experience with enhanced filtering and search options
    - Fast and easy to find and recover data
    - From sign up to backup in 5 minutes or less
  - Comprehensive Office 365 Backup and Recovery, including improved support for Teams
    - Full support of SharePoint, OneDrive, Exchange
    - Multiple recovery options for all data sources

---

## December 7, 2020

---

## Features

- Barracuda Content Shield now opens in a new browser tab when clicked in the product navigation menu. [BNPL-13450]
- Barracuda Appliance Control will now be visible to all Managed Service Provider (MSP) account types in Barracuda Cloud Control. [BNPL-13365]

## Fix

- Invalid browser time zone no longer causes Barracuda Cloud Control to become unavailable. [BNPL-13366]

## December 2, 2020

---

### Feature

- Barracuda Appliance Control will now be visible to all Managed Service Provider (MSP) account types in Barracuda Cloud Control. [BNPL-13365]

## November 17, 2020

---

## Features

- A new user login experience for Barracuda Cloud Control now available which includes re-imagined login flows, a fresh design, and support for third-party authentication.
- Single sign-on (SSO) with Microsoft Azure AD. Customers with a configured Microsoft Azure Active Directory (Azure AD) in Barracuda Cloud Control can now log into Barracuda Cloud Control using their Microsoft Azure credentials. This means that customers using multi-factor authentication (MFA) with Microsoft Azure can now use that same process for signing into Barracuda Cloud Control (SSO). This provides users with a secure, smooth login experience to Barracuda Cloud Control. See [Single Sign-On with Microsoft Azure Active Directory \(OAuth\)](#).

## October 29, 2020

---

## Enhancements

- Enhancements to the Barracuda PhishLine service in the Barracuda Cloud Control product navigation menu:
  - Barracuda PhishLine now opens in a new browser tab when clicked in the product navigation menu. [BNPL-13078]

- Redirects to Barracuda PhishLine from Barracuda Cloud Control now include the user email address, making it easier to sign into PhishLine. [BNPL-13078]
- Barracuda Forensics and Incident Response now opens in a new browser tab when clicked in the product navigation menu. [BNPL-13053]

## Fixes

- Barracuda PhishLine now opens in a new browser when clicked in the product navigation menu. [BNPL-13098]
- The link to **Barracuda Community** now opens in a new browser tab instead of the same browser tab. [BNUI-416]

## Known Issue

- Difficult to understand **Toggle Switch Status** in **Create Directory**. [BNPL-13426]

## September 16, 2020

---

## Known Issue

- Barracuda Cloud Control **Home > Admin > Users > User Details** - Name field containing a character or space, then "on" errors out upon save. [BNPL-13149]

## September 9, 2020

---

## Features

- Resolved an issue where the entitlements listing for Barracuda Message Archiver was incorrectly listed as "User" for customers in a hybrid Archiving configuration (appliance + cloud). Users in a hybrid Archiving configuration are granted the "Admin" role. [BNPL-12980]
- Barracuda PhishLine is now accessible from the Barracuda Cloud Control left-hand navigation menu. With Barracuda PhishLine, you guard against every facet of social-engineering threats with continuous simulation and training for employees. Expose them to the latest attack techniques, and teach them to recognize the subtle clues and help stop email fraud, data loss, and brand damage. Only PhishLine helps you guard against a range of threats with patented, highly-variable attack simulations for multiple vectors, including phishing, smishing, vishing, and found physical media. [BNPL-12754]

## Fixes

- Resolved an issue where the Community and Support links are now dependent upon the user's default account. A Barracuda partner or MSP will be taken to the Barracuda Partner Community site. A non-partner or MSP account will be taken to the Barracuda Customer Community site.

[BNPL-12961]

#### Known Issues

- Removed users who are currently logged in will receive an error message on their next action. [BNPL-11808]
- Users who have removed themselves from their only account can no longer access Barracuda Cloud Control. [BNPL-13082]

### July 29, 2020

---

#### Features

- Users must convert their legacy user names to email addresses. [BNPL-11698]

#### Fixes

- Same MFA device only appears once on profile page. [BNPL-12821]

### June 8, 2020

---

#### Fixes

- Multiple login attempts with invalid credentials show an error or redirects as a successful login. [BNPL-12646]
- The MFA configuration dialog box is no longer displaying as a pop-up, but pinned to the lower right-hand corner of the screen. [BNPL-12643]

### June 4, 2020

---

#### Features

- Reuse outage notification tool to allow for general notifications upon user login. [BNPL-12501]
- Home, View support cases, Manage serials, Knowledgebase support pages removed. Functionality of these pages are in the new Community site. [BNPL-12477]
- The Downloads, CloudGen F licenses, and CloudGen F download pages can now be accessed by clicking **Downloads** in Barracuda Cloud Control. [BNPL-12478]

#### Fixes

- Completing the SSG trial UI does not terminate the user's BCC session. [BNPL-12585]

---

## May 6, 2020

---

### Fixes

- Entitlements for customer accounts in the Groups display is formatted correctly. [BNPL-10149]
- Reseller accounts with more than 20 customers can select all customers using **Add Customer Account to Group**. [BNPL-11578]
- Users only in a group with the lookups\_user\_account\_sections permission group are able to add and remove all privileges and entitlements successfully. [BNPL-12435]
- Barracuda Message Archive product entitlement is no longer Admin; it is now User. [BNPL-12442]

---

## March 26, 2020

---

### Fixes

- Fixed an issue affecting the Barracuda Cloud Archiving Service, where directory syncs from AzureAD do not include the account creation time. This caused issues when accessing historical data based on the account creation time. [BNAUTH-2114]

---

## February 6, 2020

---

### Fixes

- Fixed an issue where an LDAP AD sync is failing with error "Directory has no verified domains" even when a domain is verified. [BNAUTH-2060]
- Fixed an issue where non-valid email addresses (proxyAddresses) from Active Directory and Azure AD data syncs cause email processing problems for the Barracuda Cloud Archiving Service. [BNAUTH-1974]

### Known Issue

- Users with user administrative privilege can still see Billing and Shipping links and Invoices links after clicking **Directories**. [BNPL-12334]

---

## January 7, 2020

---

**Feature**

- Implemented improvements to Azure AD user and group sync, providing performance benefits for large accounts (1,000+ users). [BNAUTH-1973]

**December 18, 2019**

---

**Fix**

- Successful connection tests no longer break the **Directories** page. [BNPL-11917]

**November 12, 2019**

---

**Fixes**

- Callback time and timezone information in technical support cases are now being captured. [BNPL-11809]
- Barracuda Technical Support cases currently in-progress are displayed on the **View Support Cases** page. [VNPL-11805]

**August 30, 2019**

---

**Feature**

- Added changes to internal ordering and technical support systems. [BNPL-11662]

**June 5, 2019**

---

**Feature**

- Barracuda Sentinel now opens in a new browser tab. [BNUI-363]

**Barracuda Appliance Control Release Firmware 4.6.4 - December 12, 2018**

---

### Vulnerability

- Barracuda Appliance Control IDOR (Insecure Direct Object Reference) - Modify and delete Groups cross-organization affects N/A. [BNCS-6299]

### Fixes

- Barracuda Email Security Gateway message log filter now works for **TimeRange** if there are multiple filters involved. [BNCS-6879]
- **Firmware Reports** through Barracuda Appliance Control now pulls in EA/GA releases for products. [BNCS-6893]
- Added latest text strings. [BNCS-6954]
- Fixed degeneration of File\_transfer workers on App nodes to address mysterious backup failures. [BNCS-6905]
- Removed account name information from Barracuda Application Control Reports. [BNCS-6933]
- Updated Barracuda Appliance Control production firmware to 4.6.4. [BNCS-6973]

## **Barracuda Appliance Control Release Cerebellum ebuild 20181204 - December 12, 2018**

---

### Feature

- Moved service worker counts to the configuration file. [BNCS-6897]

### Fixes

- Investigated climbing memory utilization on production web nodes. [BNCS-6919]
- Made a Cerebellum build with latest reign changes and deploy to QA for testing. [BNCS-6926]
- Fixed the ebuild process for Cerebellum. [BNCS-6974]
- Updated production Cerebellum to 20181204. [BNCS-6975]

## **October 31, 2018**

---

### Fix

- Fixed issue with service activations for MSPs. [BNPAY-2799]

## **September 5, 2018**

## Features

- Allowed support cases created via Barracuda Cloud Control to be assigned to the Japan region. [BNPL-9725]
- Created a publicly-available Release Notes page to communicate customer-facing changes released to production. [BNPL-9554]
- Provided information dialog to customers attempting to set up unsupported Active Directory configurations. [BNPL-9417]

## Fixes

- Support cases created via Barracuda Cloud Control are assigned to the correct queue based on the system's assignment rules. [BNPL-9605]
- Removed Barracuda Control Server from the **Downloads** page. [BNPL-9534]

## Known Issue

- Made improvements to Azure AD authorization in **Directories** page. [BNPL-9905]

## September 4, 2018

---

### Fix

- Fixed an issue that prevented some customers in North America from using the Barracuda Essentials Onboarding Wizard. [BNPAY-2968]

## August 15, 2018

---

## Features

- Improved LDAP environment clean upon removal. [BNAUTH-731]
- Allowed activation of standalone service(s) when a customer is already subscribed to bundled services. [BNPAY-2988]

## July 25, 2018

---

## Feature

- Added support for recognizing federation status of Azure domains. [BNAUTH-1467]

## Fixes

- Fixed limit of members when syncing Azure groups. [BNAUTH-1449]
- Fixed issue where dialogs would sometimes break due to the lack of a trailing slash in the URLs. [BNPL-9291]
- Fixed an issue with displaying long domain names in the Directories table. [BNPL-7006]
- Support cases created via Barracuda Cloud Control are assigned to the correct queue based on the system's assignment rules. [BNPL-9605]
