

# Virtual Permissions

Barracuda Backup requires certain permissions to access and operate on the platforms listed in the following table.

Type	Account	Required Permission
<b>VMware</b> <sup>(1)</sup>	Source/Target Host Permissions	<ul style="list-style-type: none"><li>• Root permissions on the source ESX(i) host.</li><li>• If VMware vCenter Server is used, administrator credentials are required.</li></ul>
<b>Hyper-V</b>	Source/Target Host Permissions	<ul style="list-style-type: none"><li>• Local Administrator permissions on the source and target Hyper-V server.</li></ul>

Note: <sup>(1)</sup> For more detailed permissions, see [Working with VMware](#).
