

Restore Data Using the Local Web Interface

<https://campus.barracuda.com/doc/78809459/>

You can restore data using the Barracuda Backup local web interface. Note that the local web interface does not require an Internet connection which may improve performance.

1. Open a web browser, and enter the Barracuda Backup appliance IP address.
2. Log into the Barracuda Backup web interface; the **System** page displays:

The screenshot shows the 'System' page of the Barracuda Backup web interface. It is divided into three main sections: Backup Server Information, Hardware Usage, and Network Settings. Below Network Settings is the Server Actions section.

System

Backup Server Information

- Model: BBS 190
- Serial: BAR-BS-324474
- Firmware: 5.1.03
- Network Status: ● ● ●

Hardware Usage

- CPU: [Progress bar]
- Disk Usage: [Progress bar]
- Disk IO: [Progress bar]
- Ethernet: [Progress bar]

Network Settings [CANCEL] [SAVE]

Use DHCP
Check this box to use network settings from a DHCP server.

IP Address: [10.10.10.100]
The IP address assigned to the device.

Subnet Mask: [255.255.252.0]
The subnet mask assigned to the device.

Default Gateway: [10.10.10.1]
The IP address of the next outbound hop from the device.

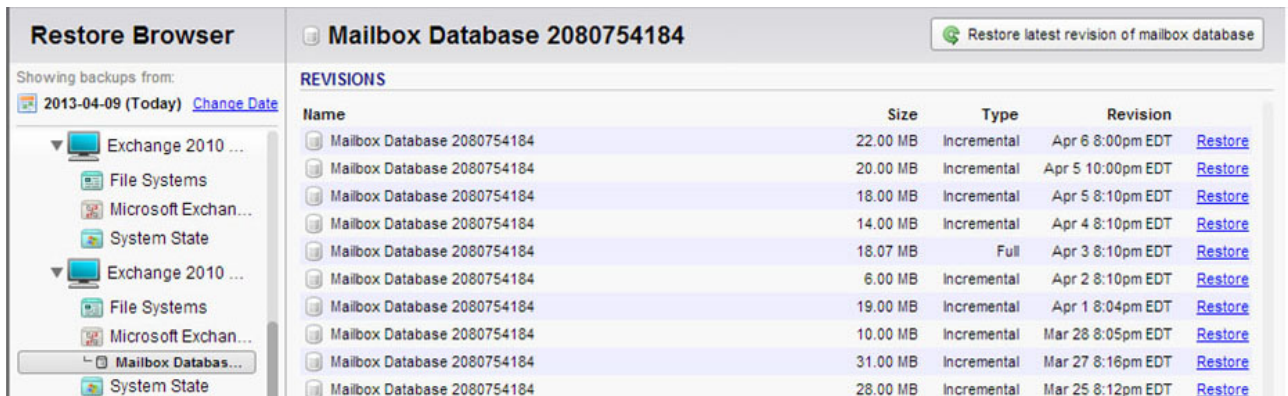

DNS Servers: [10.10.10.100]
[10.10.10.101]

Server Actions

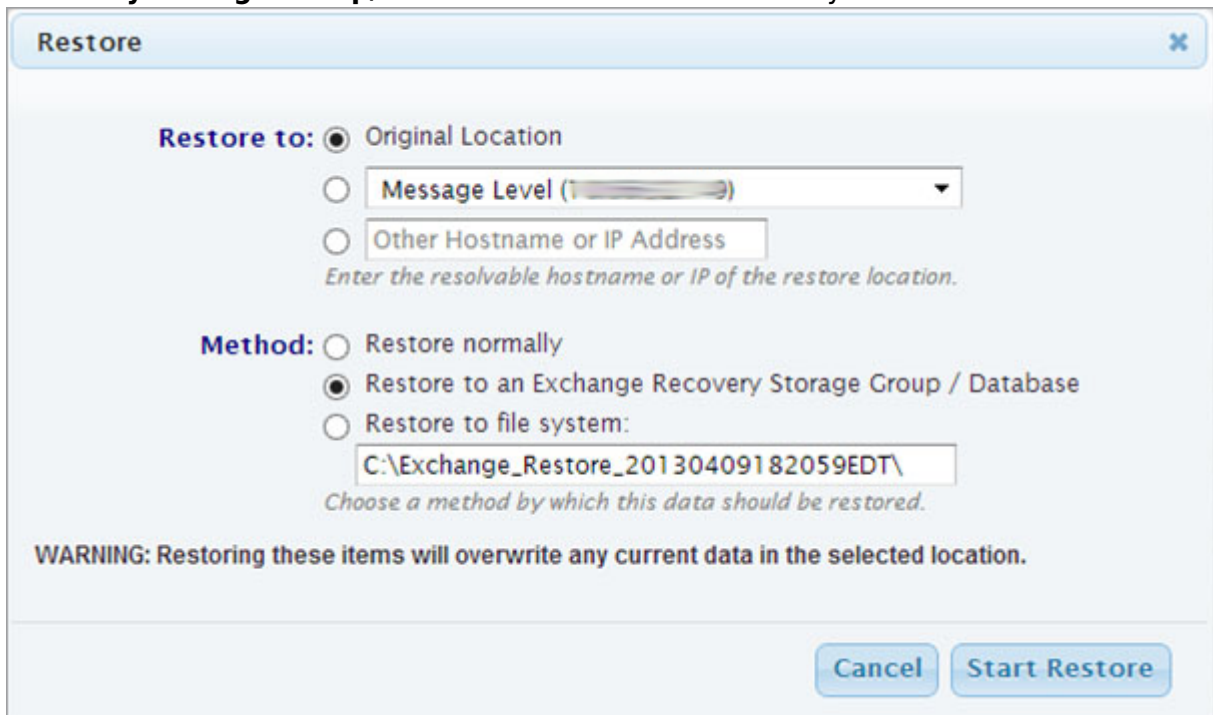

Maintenance: [Reboot] [Shut Down] [Open Support Tunnel]
Reboots, shuts down, or opens a support tunnel to your backup server.

Wipe Backup Server: [Wipe Backup Server]
*Resets your backup server to its factory state.
All user data will be removed from the backup server and in the cloud if you select this option.*

3. Click the **Restore** tab, and select the server from which to restore data. In the following example, a Microsoft Exchange Database is selected:

4. Click the **Restore** link to the right of the data you want to restore; the **Restore** window displays. Select the **Restore to** and **Method** for restoring the data, for example, select **Original Location** to select the original server, and select **Restore to an Exchange Recovery Storage Group/Database** to restore to a recovery database:

5. Click **Start Restore**; the **Restoration in progress** window displays:

6. Click **OK**. In the web interface, go to **Reports > Restore** to view the restoration status:

Backup **Restore** Large items

Restore Reports

| Source | Destination | Start Time | Duration | Size | Errors | Warnings | |
|--|------------------------|--------------------------|-------------------------------|--------------------|--------|----------|---|
|  Exchange 2010 DAG2 as of 04-06 20:00 EDT | 0 items affected | 6:23pm EDT Apr 9 2013 | 1 minute 8 seconds elapsed | 0 bytes | 0 | 0 |   |
|  ESXI as of 04-09 23:59 EDT | 1 restored (40.00 GB) | 3:30pm EDT Apr 9 2013 | 15 minutes 17 seconds | 40 gigabytes | 0 | 0 |  |
|  Gibson General Hospital as of 04-08 21:47 EDT | 11 restored (27.18 KB) | 1:40pm EDT Apr 9 2013 | 41 seconds | 27.18 kilobytes | 0 | 0 |  |
|  Gibson General Hospital as of 04-08 21:47 EDT | 4 restored (26.03 MB) | 1:39pm EDT Apr 9 2013 | 38 seconds | 26.03 megabytes | 0 | 0 |  |
|  ESXI as of 04-09 23:59 EDT | 1 restored (40.00 GB) | 1:13pm EDT Apr 9 2013 | 14 minutes 5 seconds | 40 gigabytes | 0 | 0 |  |

- Once the restore is complete, the left column displays a green indicator (●) next to the restored data source.
