

## Install and Configure the Backup Export Tool

<https://campus.barracuda.com/doc/78809683/>

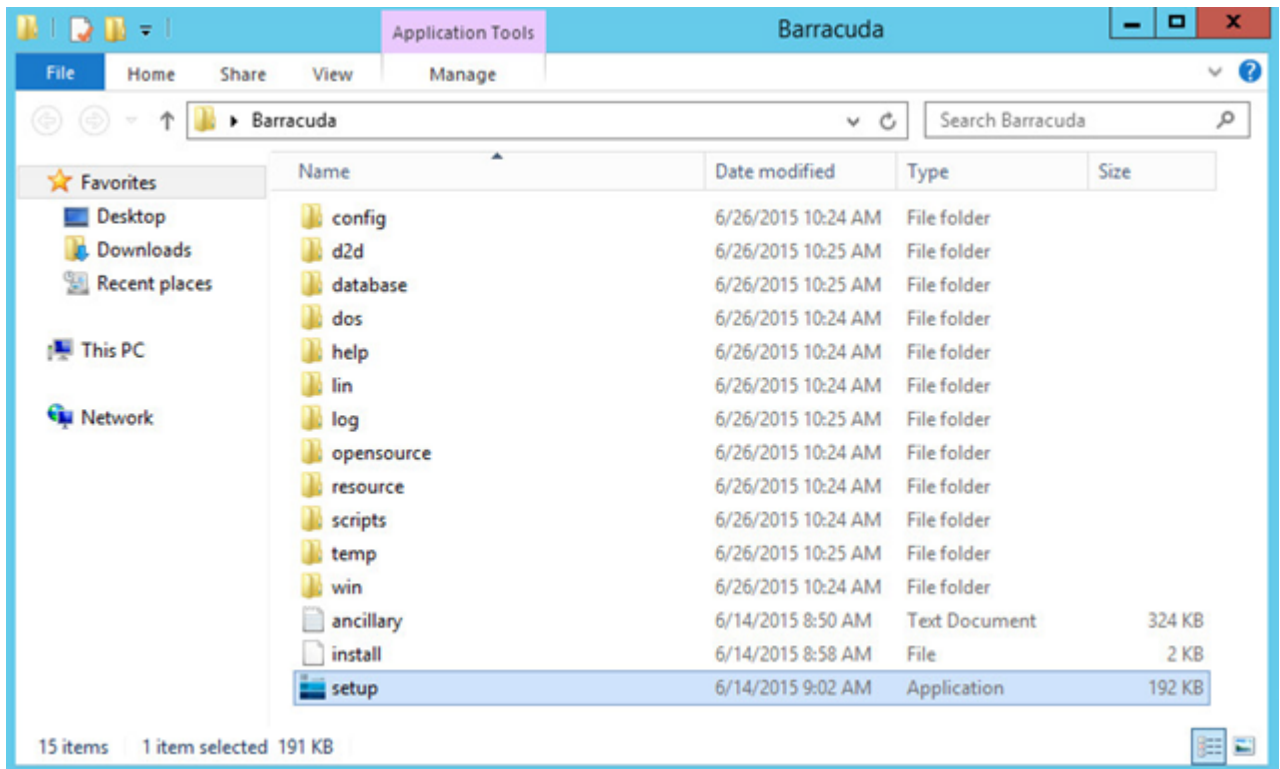

### Install the Backup Export Tool

Use the following steps to install the Backup Export Tool:

1. Log into Barracuda Backup, and go to the **System > Software Downloads** page.
2. In the **Backup Export Tool** section, click **Download the latest version** to download and save the Backup Export Tool installer to the target primary server.
3. **Right-click** the installer, and then click **Run as administrator**.
4. In the installer window, select a **Destination folder** where you want to extract the installer, and then click **Extract the installer**.

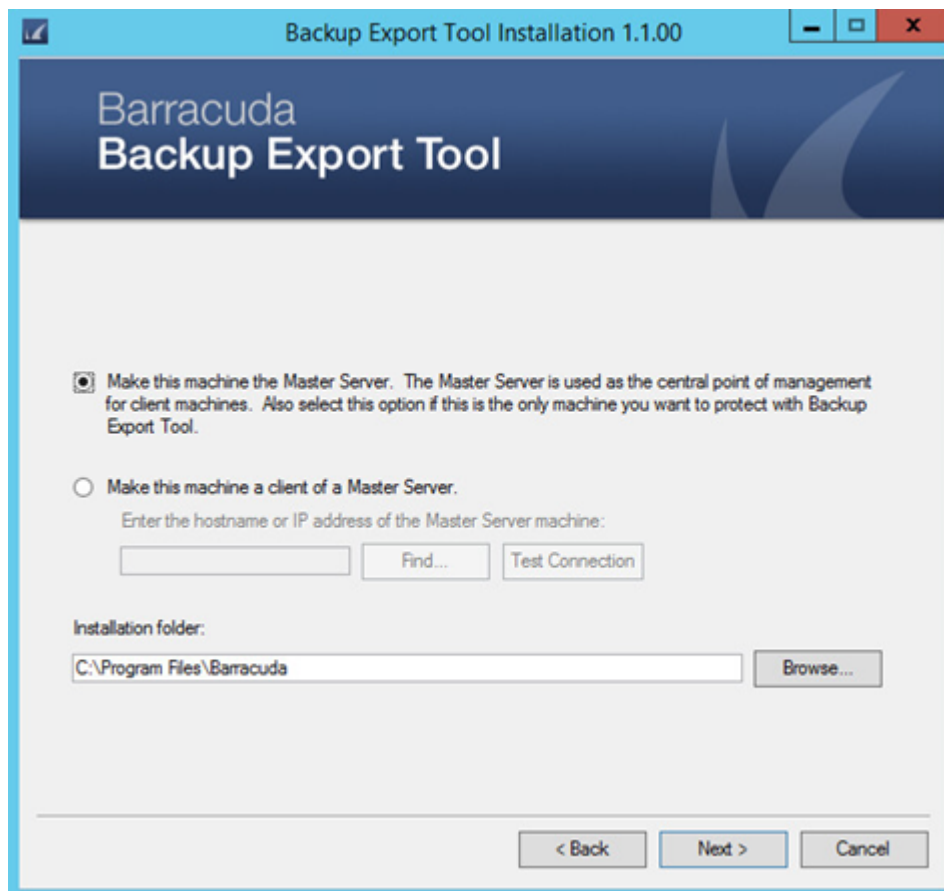

5. Once the installer is extracted, locate and open the folder from the specified destination folder:

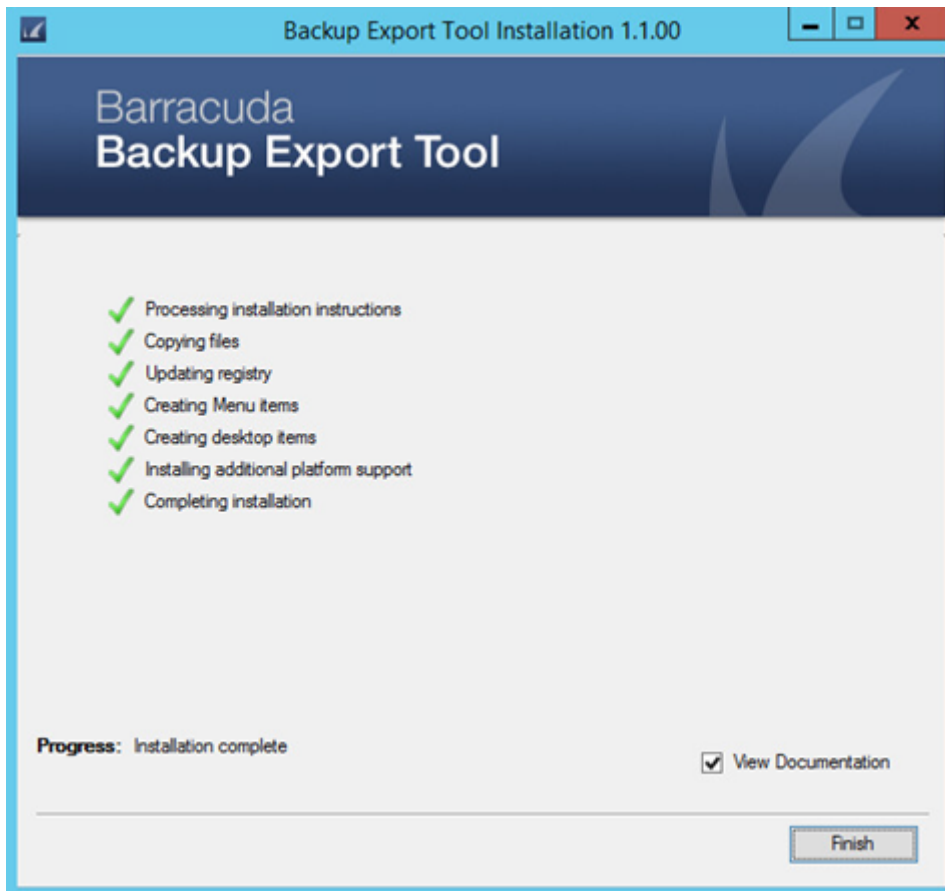

6. Right-click **setup.exe**, and then click **Run as administrator** to launch the Backup Export Tool installer:

7. Select your language from the drop-down menu, and click **OK**.  
8. Accept the Software License Agreement terms, and click **Next**.  
9. Select **Make this machine the Master Server** and choose an **Installation folder**:

10. Click **Next**. Allow the installation to complete:

11. Click **Finish**. The Backup Export Tool is now installed.

## Configure the Backup Export Tool

Use the following steps to configure the Backup Export Tool:

1. Log into Barracuda Backup according to your setup:
  - For remotely controlled appliances: log into <https://login.barracuda.com/>
  - For locally controlled appliances: log into the appliance IP address
2. Go to the **System > Barracuda Backup Appliance Settings** page, and enter the IP address of the host server where you installed the Backup Export Tool:

**Backup Export Tool Settings**

Enter the IP address of the Backup Export Tool host.

Host IP Address:

[Click here](#) for more information on setting up the Backup Export Tool.

3. Click **Save**.
4. The Backup Export Tool is now configured for use.
