Fixes

- Fixed an issue preventing SharePoint items from backing up successfully. [CCB-9003]
- Fixed an issue preventing backup jobs from completing. [CCB-15660]
- Fixed an issue preventing restores from completing when restoring data to SharePoint sites with duplicate names. [CCB-15942]

What's New in Cloud-to-Cloud Backup (October 2020, Version 2.6.03)

Enhancement

- Improved performance for backup and restore operations. [CCB-15639]

What's New in Cloud-to-Cloud Backup (September 2020, Version 2.6.03)

Fix

- Fixed an issue that was causing some SharePoint items to run full backups instead of incremental backups. [CCB-15587]

What's New in Cloud-to-Cloud Backup (August 2020, Version 2.6.03)

Enhancement

- Improved performance for backup and restore jobs. [CCB-14480]

Fixes

- Fixed an issue where Groups restore would fail if the Group had more than 20 members. [CCB-10386]
- Fixed an issue causing some Groups libraries to always run a first pass instead of an incremental backup. [CCB-14604]

What's new in Cloud-to-Cloud Backup (August 2019, Version 2.6.00)

New Features

- Backup and restore Office 365 Groups/ Microsoft Teams data. [CCB-9297]
  Note: For more detailed information, see Understanding What Office 365 Groups Data is Backed Up.

Enhancements

- Improved throttle handling for Exchange backups and restores for better performance. [CCB-9245, CCB-9291, CCB-9415, CCB-9458]

Fixes

- Throttle requests from Microsoft no longer cause warnings on Exchange backups. [CCB-9498]

What's New in Cloud-to-Cloud Backup (June 2019, Version 2.5.02)

Enhancements

- Improved processing speed for aborted backup and restore operations.
- Improved faster processing for Office 365 authentication.

Fixes

- **Reauthorize** button in email alerts redirects to the correct page. [CCB-7606]
- Larger folder enumeration no longer prevents backup jobs from completing. [CCB-8422]
- Jobs take the expected amount of time to complete and no longer have a high rate of warnings in reports. [CCB-8630]

- SharePoint and OneDrive items no longer fail to back up. [CCB-9018]

What's New in Cloud-to-Cloud Backup (March 2019, Version 2.5.00)

New Features

- Back up and restore Exchange Calendars, Contacts, and Tasks. [CCB -37]
  Note: This functionality will be following a staged roll-out and might not be available to all customers right away.
- Exchange and OneDrive restores items back to their original folders instead of a custom created "Restore" folder. [CCB-6012]
  Note: Restores to alternate locations will still create a "Restore" folder.

Enhancements

- Improved incremental back up performance for SharePoint and OneDrive schedules. [CCB-7134]
  Note: This functionality will be following a staged roll-out and might not be available to all customers at the time being.

Fixes

- Throttle requests from Microsoft no longer cause warnings on SharePoint and OneDrive backups. [CCB-7969]
- SharePoint Modern Team sites perform incremental backups as expected. [CCB-5556]
- Restored items in SharePoint display "Item already exists" warning message if the restored items already exist. [CCB-5574]

What's New in Cloud-to-Cloud Backup (October 2018, Version 2.4.00)

Enhancement

- Improved performance for backups and restores.

Fixes

- Items display properly in the **Restore Browser**. [CCB-5660]
- Improved handling of OneDrive throttle messages. [CCB-4783]
- Wrong warning message no longer displays on restore jobs. [CCB-4975]
- OneDrive items no longer fail during restore. [CCB-4970]
- Exchange restores generate data as expected. [CCB-5751]

What's New in Cloud-to-Cloud Backup (September 2018, Version 2.3.09)

Fixes

- Customers can now send summary reports. [CCB-2166]
- **Restore Browser** no longer appears one day ahead of the selected time. [CCB-4565]
- Daily summary emails no longer show up as empty. [CCB-3940]
- Repetitive warnings on some Exchange email content no longer appear. [CCB-4417]

What's New in Cloud-to-Cloud Backup (September 2018, Version 2.3.08)

Enhancement
