## How to Configure Administrative Roles

<https://campus.barracuda.com/doc/79463192/>

As part of an administrative profile, administrative roles define the operative permissions and restrictions of an administrative user to the different services of the Barracuda Firewall Control Center and the managed Barracuda CloudGen Firewalls. When configuring administrative roles, you can define which services the administrative user is allowed to access and which operations they are allowed or denied to perform on the services. You can then assign the role to an administrative profile (see [How to Configure Administrative Profiles](#)).

### Roles Permissions and Restrictions

---

Administrative roles permissions and restrictions are defined as follows:

<b>Box Menu</b>	<b>Software Item</b>	<b>Manager</b>	<b>Operator</b>	<b>Observer</b>	<b>Editor</b>	<b>Administrators</b>
-----------------	----------------------	----------------	-----------------	-----------------	---------------	-----------------------

<b>CC Configuration</b>	<b>Access to CC Config</b>	Yes	Yes	Yes	Yes	Yes
	<b>Kill Sessions</b>	Yes	Yes	No	Yes	No
	<b>Change Permissions</b>	Yes	No	No	Yes	No
	<b>Change Events</b>	Yes	No	No	Yes	No
	<b>Show Admins</b>	Yes	No	Yes	Yes	No
	<b>Manage Admins</b>	No	No	No	No	Yes
	<b>Create/Remove Range</b>	Yes	No	No	Yes	No
	<b>Create/Remove Cluster</b>	Yes	No	No	Yes	No
	<b>Use RCS</b>	Yes	No	Yes	Yes	No
	<b>Create/Remove Boxes</b>	Yes	No	No	Yes	No
	<b>Create/Remove Servers</b>	Yes	No	No	Yes	No
	<b>Create/Remove Service</b>	Yes	No	No	Yes	No
	<b>Create/Remove Repository</b>	Yes	No	No	Yes	No
	<b>Manage HA Sync</b>	Yes	Yes	No	Yes	No
	<b>Create PAR File</b>	Yes	No	No	Yes	No
	<b>Allow Config View on Box</b>	Yes	Yes	Yes	Yes	No
	<b>Allow Emergency Override</b>	Yes	No	No	Yes	No
	<b>Create/Remove Workspace</b>	Yes	No	No	Yes	No
<b>Change Workspaces</b>	Yes	No	No	Yes	No	
<b>Box Menu</b>	<b>Software Item</b>	<b>Manager</b>	<b>Operator</b>	<b>Observer</b>	<b>Editor</b>	<b>Administrators</b>

<b>CC Control</b>	<b>Access to CC Control</b>	Yes	Yes	Yes	Yes	Yes

<b>REST API</b>	<b>Access to REST API</b>	Yes	No	No	No	No
<b>Internal API Access</b>	<b>Access to internal REST Api interface</b>	Yes	No	No	No	No
<b>External API Access</b>	<b>Access to external REST Api interface</b>	Yes	No	No	No	No
<b>Write Access</b>	<b>Access to REST Api interface</b>	Yes	No	No	No	No

## Configure Administrative Roles

1. Go to **CONFIGURATION > Configuration Tree > Multi-Range > Global Settings > Administrative Roles**.
2. Click **Lock**.
3. In the **Roles** section, click **+** to create a new role. You can also edit and modify an existing entry.
4. Enter a **Name** for the role (only numbers are allowed) and click **OK**. The **Roles** configuration window opens.
5. To provide the administrative role with access to a service:
  1. Select the **Access to <service name>** check box.
  2. Click **Set/ Edit** to configure detailed permissions for the service and click **OK**.

It is recommended that you grant the **Show Map** permission in the **CC Control Module** section to every admin role. Admins that do not have this permission will get an error message immediately after they log into the Control Center.
6. Click **OK**.
7. Click **Send Changes** and **Activate**.

You can now assign the administrative role to an administrative user profile (see [How to Configure Administrative Profiles](#)).

## Apply the Administrative Role to a Profile

1. Click the **ADMINS** tab.
2. Right-click the admin profile in the list and select **Lock**.
3. Edit the profile.
4. Select the administrative role from the **Roles** list. (If you just want to assign specific roles, clear the **Allow All Operations** check box.)
5. Click **OK**.
6. Click **Activate**.

The administrative user can now view and edit settings and services on the Barracuda Firewall Control Center according to their assigned roles.
