

CC Sessions Page

<https://campus.barracuda.com/doc/79463256/>

The Control Center **Sessions** page lists open supervising sessions on administered firewalls. To access the **Sessions** page, click the **CONTROL** tab and select the **Sessions** icon. The data displayed on the **Sessions** page is similar to the information shown on each CloudGen Firewall. For more information, see: [Sessions Page](#).

On the **Sessions** page, the information is divided into the following columns:

- **Box** - The name of the CloudGen Firewall.
- **Cluster** - The name of the cluster the box resides in.
- **Range ID** - The name of the range that cluster and box belong to.
- **Service** - The following icons describe the service responsible for the session:
 - **Firewall** - Firewall control session (Service firewall_).
 - **User Login** - Login session.
 - **Blue Firewall Locked** - VPN session (Service VPN-Service_*vpn).
 - **Clock** - Log viewer session (Service box_logd).
 - **Stats Green Tick** - Statistics viewer session (Service box_qstatd).
 - **Red Circle Square** - Box control session (Service box_control).
 - **Clog Wheel** - Firewall Admin session (Service phiona).
 - **Clog Wheel** - Indicates a sync operation.
- **IP** - The IP address of the firewall.

- **Info** - The optional box description as inserted into the **Description** field of the Box Config file.
- **Service Name** - The name of the service that has been accessed.
- **Peer** - The IP address from where the session was started.
- **Admin** - The name of the administrative account that has logged in.
- **Start** - The period that has passed since the session started.
- **PID** - The internal, unique process ID.
- **Fully Qualified Name** - The full name of the unit.

Double-clicking an entry opens the **Detail** window summarizing all available information regarding the specific session.

The **Sessions** tab does not display configuration sessions that, for example, are produced by locking configuration nodes. For information on active configuration sessions, go to the [CC CONFIGURATION Tab](#).

Filter Section

To access the filter section, click the filter icon (**Show**) on the top right of the page. Here, you can filter the list entries by box, cluster, range ID, or by other information. The filter is applied as soon as you click the list.

Filter:

Box	-
Cluster	HQ6
Range ID	-
IP	-

Box	Cluster	Range ID	Service	IP	Info	Service Name	Peer	Admin	Start	PID
1										
HQ-NG2-HA	HQ6	1		10.0.10....		NGAdmin	10.0.10....	root	501 d	15976
HQ-NG2-HA	HQ6	1		10.0.10....		box_control	10.0.10....	root	501 d	15989
HQ-NG2-HA	HQ6	1		10.0.10....		box_control	10.0.10....	root	501 d	16046

To remove filter settings, click the **Reset** (red cross) icon. To hide the filter, click the filter icon (**Hide**) on the top right of the page.

Context Menu

Right-clicking on a session opens the context menu, which provides the following options:

- **Refresh** - Refreshes the session display.
- **Kill Session** - Terminates the selected session.

For more information on the standard context menu, see [Barracuda Firewall Admin](#).
