

Web Interface Firmware Update Page

<https://campus.barracuda.com/doc/79463270/>

To keep your CloudGen Firewall up to date, install firmware updates and hotfixes through the web interface. Your firewall automatically receives notifications from Barracuda Networks update servers when compatible updates are available. The firewall shows all available updates in the **Available Updates** list. Downloading and installing an update must be triggered manually.

The screenshot displays the Barracuda CloudGen Firewall web interface. The top navigation bar includes the Barracuda logo, 'CloudGen Firewall', and user information (root, Sign out, English). Below this is a secondary navigation bar with tabs: BASIC, NETWORK, FIREWALL, VPN, USERS, LOGS, and ADVANCED. The 'Firmware Update' tab is selected under the 'ADVANCED' section. The main content area is divided into two sections: 'Available Updates' and 'Installed Updates'. The 'Available Updates' section contains a table with one update entry: 'Barracuda Firewall Admin 8.0.0 Cloud Release', which has a 'Download' button. The 'Installed Updates' section is currently empty.

Install a Firmware Update via the Web Interface

1. Go to **ADVANCED > Firmware Update**.
2. Locate the firmware update you want to install and click **Download**. When complete, the action tag **Install** is displayed.
3. Click **Install**.
4. Click **Accept** to start the installation.

After the firmware update is successfully installed, it is listed in the **Installed Updates** list.
