

## Training Videos

<https://campus.barracuda.com/doc/79463832/>

Developed for today's time-pressed viewers, these engaging and informative videos cover the basics and more – all in about the time it takes to power up a computer.

These videos – along with many others – are available in the Security Awareness Training Content Center where you can use them in Campaigns to train your users. For example, if a user clicks a link in a phishing email, you might send them to a landing page with a video. Or you might have a campaign that exists solely to share training material.

**Note:** Videos on this page are shown as examples. To share any of the available videos with your users, you must integrate them into a Campaign you create.

For more information, refer to [Training Content](#) and [Landing Pages](#).

For your convenience, you can download these videos in several languages from the [Language Support](#) article.

## List of Available Training Modules

All currently available training modules, along with test questions and answers, are available [in this list](#).

## What is Phishing

And given the regulatory environment, no company wants to consider the potential audit findings for failing to address phishing attacks.
