

## Training Videos

<https://campus.barracuda.com/doc/79463832/>

Developed for today's time-pressed viewers, these engaging and informative videos cover the basics and more – all in about the time it takes to power up a computer.

These videos – along with many others – are available in the Barracuda PhishLine Content Center where you can use them in Campaigns to train your users.

For your convenience, you can download these videos in several languages from the [Language Support](#) article.

## List of Available Training Modules

All currently available training modules, along with test questions and answers, are available [in this list](#).

## What is Phishing

Phishing attacks use various means, the most common mean is email.

## Types of Phishing

Cyber-criminals use four Phishing techniques to steal personal information or gain access to a company's network: Phishing, Spear Phishing, Vishing and SMishing.

---

## Understanding URLs

---

Perhaps you've come across the term "URL" and wondered what it meant. Or maybe this is the first time you've heard it, and you're curious to know more.

---

## Spotting Phishing Scams

---

**IF**

No one wants to become the victim of a phishing attack. But phishing emails are easy to spot and avoid, if you know what to look for.

---

## Ransomware

---

It seems as though ransomware attacks are always making headlines.
