
Endpoints List

<https://campus.barracuda.com/doc/79464553/>

The **Endpoints** page is a record of the threats seen and the agent version installed on the endpoint.

On the **Endpoints** page, search by **Endpoint Name**. You see the following for each endpoint:

- OS – An icon representing the operating system installed on the endpoint.
- Endpoint Name – The name the administrator has given to the endpoint.
- Threats – Total number of threats seen for the time frame, as specified (**Last 24 hours**, **Last 7 days**, or **Last 30 days**).
- Last Threat – Date and time of the last threat seen for the endpoint.
- Agent Version – The version of the agent installed on the endpoint.

Sorting Data

- On the upper right of the page, select **Last 24 hours**, **Last 7 days**, or **Last 30 days**.
- Sort the table by clicking the up arrow next to **Endpoint Name**.

Note that endpoint data is retained for 30 days.

Support Tool

Barracuda Networks Support can access a customer's Barracuda Content Shield service and log in to troubleshoot any issues if the **Support Access** feature is enabled. The tool can be accessed in the BCS portal from the **ENDPOINTS** page. See [Support Tools for Barracuda Content Shield](#) for details.
