

## How to Allow (Whitelist) Senders

<https://campus.barracuda.com/doc/79468265/>

You can allow (whitelist) specific senders by email or domain.

*Use caution* when adding to the Allowed Senders list. Barracuda Sentinel cannot remediate attacks sent from these senders.

### Adding to the Allowed Senders List

To add specific senders to the Allowed Senders list:

1. From the menu, select **Dashboard**.
2. In the top right corner, click the Settings icon  to access the administrative functions.
3. Select the **Allowed Senders** tab.
4. In the **Sender Email or Domain** section, enter one email or domain name you want to allow.

**Note:** Based on the safety note above, the system allows you to enter only one sender at a time, rather than adding in bulk. Enter one domain or email in this field and complete the steps below. Repeat the process, as needed, for each additional email or domain.

5. Optionally, add a note in the **Comment** field.
6. Click **Save**.
7. Complete steps 4 through 6 for any additional senders you want to whitelist.

### Deleting a Allowed Sender

To delete an allowed sender, on the **Allowed Senders** page, click the Delete  icon.

### Editing a Allowed Sender

To edit an allowed sender, on the **Allowed Senders** page, click the Edit  icon. Make any changes, then click **Save**.
