
Introduction to PSA Integrations for Hosting Administrators

<https://campus.barracuda.com/doc/85491729/>

With Barracuda Managed Workplace, it is now possible to offer a wider range of Professional Services Automation (PSA) tool integrations to your VARs.

Your VARs can integrate their Hosted version of Barracuda Managed

Workplace with the following PSA systems without any action required on your part:

- Microsoft Dynamics CRM
- Autotask
- OnForce

However, to make it easy for your VARs to integrate with any of the following PSA systems, you must enable a pre-set configuration and make it public:

- ConnectWise - see [Setting Up and Enabling ConnectWise Integrations](#)
- Tigerpaw - see [Setting Up and Enabling Integrations with Tigerpaw](#)
- Fieldpoint - see [Setting Up and Enabling Integrations with Fieldpoint](#)
- Solutions360 - see [Setting Up and Enabling Integrations with Solutions360](#)
- custom service integrations - see [Setting Up and Enabling a Custom Service Integration](#)[Custom Service Integrations](#)
