

System Log Viewer

<https://campus.barracuda.com/doc/85491744/>

Overview of the System Log Viewer Page

You can use the System Log Viewer window to see a list of all system logs that have been generated. You can apply filters to the list to see only certain log entries. The filters you can use are:

- Severity (critical, error, warning, or information)
- Error Code
- Module

To filter the system log list

1. In the Hosted Console website, click **Configuration > System Log Viewer**.
2. Apply any combination of the following filters to the list:
 1. In the **Severity** box, select the check box for each severity for which you want to see the system logs having the specified severity.
 2. In the **Error Code** box, type the error code of the logs you want to see.
 3. In the **Module** box, type the module (Monitoring, for example) for which you want to see system logs.
 4. Select a time frame using the date and time pickers.
3. Click **Filter**.

You can click a system log entry in the list to view details about it in the Message Details dialog box.

To view the message details

1. In the **Time** column of the log list, click the log entry.
2. While viewing the system log message details, if desired, you can click **Up** or **Down** to scroll through the other system log entries to view their message details.
3. When you are done viewing the message details, click **OK**.
