

## Cloud Features

<https://campus.barracuda.com/doc/8650761/>

Barracuda Networks offers two cloud services to centrally manage multiple Barracuda NextGen X-Series Firewalls and offload processor-intensive tasks:

### Barracuda Cloud Control

Barracuda Cloud Control is a comprehensive cloud-based service that lets you monitor and configure multiple Barracuda Networks products from a single console. When your X-Series Firewall is linked to Barracuda Cloud Control, it continuously synchronizes its configuration settings with the service.

For more information on Barracuda Cloud Control, see [Barracuda Cloud Control](#) and [How to Connect to Barracuda Cloud Control](#).

### Barracuda Web Security Service

Barracuda Web Security Service is a cloud-based web filtering and security service. It helps conserve bandwidth by enforcing web policies in the cloud before forwarding traffic to the X-Series Firewall.

For more information on the Barracuda Web Security Service, see [Barracuda Web Security Service](#) and [How to Configure the Barracuda Web Security Service](#).
