Bot Spam Protection

https://campus.barracuda.com/doc/86542974/

Bots across the Internet cause a lot of spam for website owners and organizations. Common spam bots include comment spam and referrer spam.

- **Referer Spam** also known as 'log spam' or 'referer bombing' is a kind of spamdexing (spamming aimed at search engines). [From Wiki]
- **Comment Spam** is typically characterized as irrelevant messages posted by spammers as comments on forums and blogs.
- **Form Spam** provides protection against fake/automated form submissions.
