

Review User Roles

<https://campus.barracuda.com/doc/86545708/>

MSPs should review the roles assigned to users as well as the permissions associated with different roles. This review should be done regularly to ensure each user is not given more permissions than needed to do the job.

Security is of utmost importance at every business, including here at Barracuda MSP. Please review your security settings for your Barracuda Networks products, as well as the rest of the solutions you manage to ensure you are complying with security best practices.

For more information about how to configure your security settings with Barracuda MSP products, please visit the [Barracuda MSP products security considerations](#).
