Setting Archiving Rules

https://campus.barracuda.com/doc/86545829/

Archiving rules are specific to each type of backup set and must be configured while creating or editing the backup set.

You can set the number of days that the backup sets are kept and set the number of versions that are kept.

The more versions that you keep can cause higher storage usage.

If changed, the Archiving Rule applies to the data you back up when the next backup runs. Previous backup sets are not affected.

See the ECHOplatform Backup and Restore Reference Guide on how to adjust the archiving rules for a

backup set.
