

## About the Backup Monitor

<https://campus.barracuda.com/doc/87196013/>

The Backup Monitor can be used to perform the following:

- Routine Tasks
- Re-installation Tasks

### Routine Tasks

The Backup Monitor can be used to perform the following routine tasks:

- Run a Hyper-V, VMware, and Image backup
- Delete a Hyper-V, VMware, and Image backup
- View logs related to image and VMware actions
- View image and VMware backups in the Account Summary and Backup Sets screens

**You cannot create or edit Hyper-V, VMware, or Image backups using the Backup Monitor.**

You can create these backups using the management portal at <https://manage.barracudamsp.com>.

### Re-installation Tasks

The Backup Monitor can be used to perform the following re-installation tasks:

- Recover Previous Installation
- Move Account to this Computer
- Recovery Mode Installation

#### Recover Previous Installation

Select **Recover Previous Installation** if you are re-installing the software on the computer on which the software was originally installed.

#### Move Account to this Computer

Select **Move Account to this Computer** if you are installing the software for this subaccount on a

new or replacement computer.

## Recovery Mode Installation

Select **Recovery Mode Installation** if you are installing to perform a restore and if the original software for this subaccount is still installed and active on the original computer.

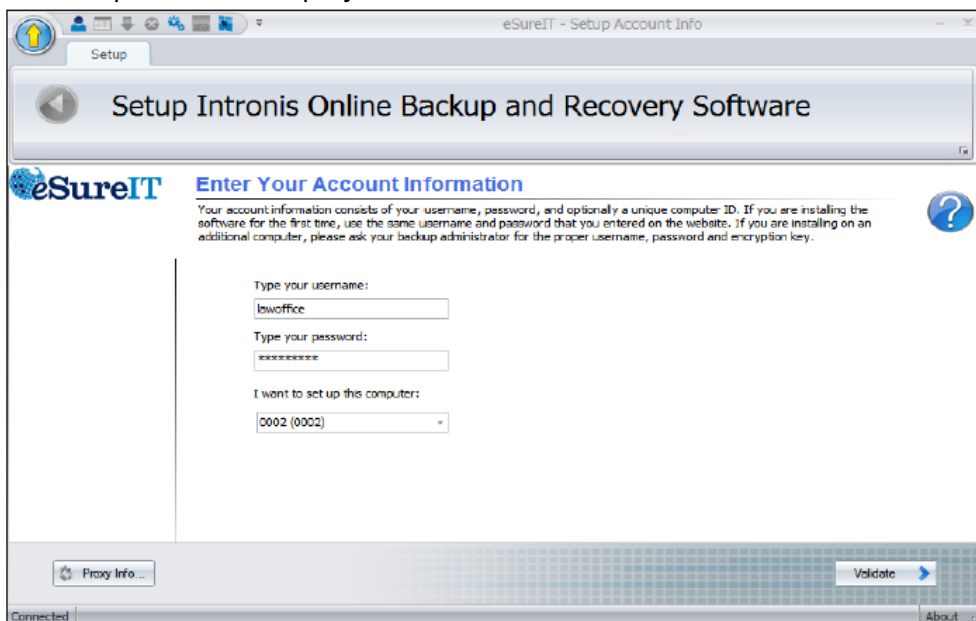

## Re-installation Procedure

To perform any of the re-installation tasks, perform the following steps.

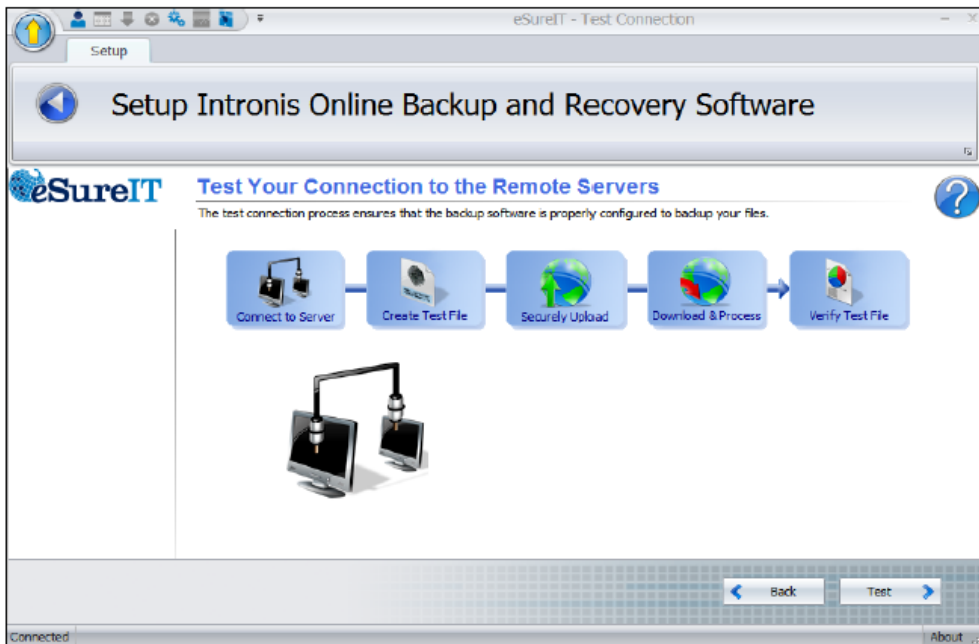

1. Click the Backup Monitor shortcut displayed on your desktop.

The Setup screen is displayed.

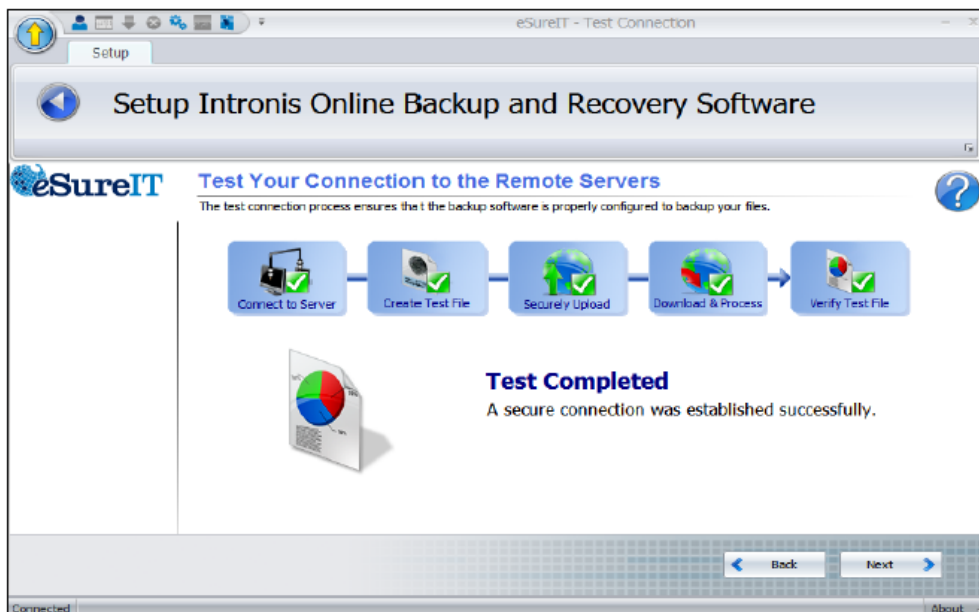

2. Type username, password, and computer, and then click **Validate**.  
The Test screen is displayed.

3. Click the **Test** button.

The tests are performed, and the Next button is displayed.

4. Click **Next**.

The Setup Type screen is displayed.
