

Release Notes - Barracuda NAC/VPN Client 5.1 for Windows

<https://campus.barracuda.com/doc/90440079/>

Barracuda NAC 5.1 for Windows

This is a 5.1.x Feature Release containing several architectural changes. Before starting a production roll-out, please consider whether a Maintenance Release or a Feature Release is the best version for your requirements balanced against risk. We always recommend that you test the client in your own environment and then do a staged iterative roll-out in order to quickly identify any issues running the client in your specific environment.

Before installing the new software version, back up your configuration and read all of the release notes that apply to the versions that are more current than the version that is running on your system.

Do not manually reboot your system at any time while the update is in process, unless otherwise instructed by Barracuda Networks Technical Support.

Download this Release

You can download the install files for the Barracuda Network Access Client from <http://login.barracudanetworks.com>

Version 5.1.3

- Barracuda Network Access Client version 5.1.3 is a maintenance release. This version is the direct successor to Barracuda Network Access Client version 5.1.2 and contains all improvements and features delivered with version 5.1.2.
- Updating to Barracuda Network Access Client 5.1.3 is possible for any prior version.

Improvements Included with Barracuda Network Access Client 5.1.3

- VPN now automatically reconnects when switching between network interfaces. (BNNGF-66287)
- VPN Registry Check Rules in HKEY_CURRENT_USER are now executed properly. (BNNGF-66162)
- VPN Client no longer crashes if tunnel compression is used. (BNNGF-71648)

Version 5.1.2

- Barracuda Network Access Client version 5.1.2 is the direct successor to Barracuda Network Access Client version 5.1.1 and contains all improvements and features delivered with version 5.1.1.
- Updating to Barracuda Network Access Client 5.1.2 is possible for any prior version.

Improvements Included with Barracuda Network Access Client 5.1.2

- Barracuda Personal Firewall now gets registered properly during system startup. (BNNGF-64751)
- Direct Access now correctly picks up stored credentials from Windows Credential Vault. (BNNGF-64306)
- An issue regarding slow connection behavior with DHCP-based address assignment has been fixed. (BNNGF-65134)
- AD probing now works properly even if multiple (local) network interfaces are present. (BNNGF-64292)
- Entering invalid user credentials for Direct Access no longer causes an automatic connection retry. (BNNGF-65082)

Version 5.1.1

- Barracuda Network Access Client version 5.1.1 is the direct successor to Barracuda Network Access Client version 5.1.0 and contains all improvements and features delivered with version 5.1.0.
- Updating to Barracuda Network Access Client 5.1.1 is possible for any prior version.

Improvements Included with Barracuda Network Access Client 5.1.1

- VPN connector no longer shows incorrect error message if a connection attempt was canceled. (BNNGF-61956)
- An issue has been fixed where the user received multiple OTP tokens when using One-Time-Password authentication. (BNNGF-63328)
- Interface metric is now set correctly when using Adapter Prioritization. (BNNGF-62975)

Version 5.1

- Barracuda Network Access Client version 5.1 is the direct successor to Barracuda Network Access Client version 5.0.4 and contains all improvements and features delivered with version 5.0.4.

- Updating to Barracuda Network Access Client 5.1 is possible for any prior version.
- CudaLaunch 2.5.1 for Windows adds support for CudaLaunch VPN connections via Barracuda Network Access Client v5.0.0. If you are using the Network Access Client in conjunction with CudaLaunch, please ensure that you upgrade CudaLaunch to 2.5.1 or higher.
