

## Updating and Installing Service Center Components

<https://campus.barracuda.com/doc/90441747/>

Update Center provides a means for you to install new components and component updates from within Service Center, without the need to access the **Partner Portal** for downloads or to import components locally. You can install the following components:

- monitoring policies
- service modules
- reports
- automation (scripts and automation packages)
- printer transforms
- service desk modules
