

## Configuring Avast Business Antivirus Policies: Configuring Antivirus Settings

<https://campus.barracuda.com/doc/90442184/>

The antivirus settings of Avast Business Antivirus Policies include:

- **DeepScreen**—Enable to run suspicious programs that aren't known to core antivirus technologies in the **Sandbox**, where it is compared to malicious behavior patterns, giving you the chance to allow or block it.
- **CyberCapture**—Enable the **CyberCapture** cloud-based smart file scanner to isolate suspicious files in a safe environment and automatically establish a two-way communication channel with **Avast Threat Labs** for immediate analysis.
- **Hardened Mode**—Enable to evaluate files is based on their reputation coming from the cloud.
- **Exclusions**—Identify paths and URLs excluded from scanning and shield protection.

1. Click **Configuration > Policies > Avast Antivirus**.
2. Click the name of a policy.
3. Click one of the following tabs:
  - **Workstation Settings**
  - **Server Settings**
4. Click the **Antivirus Settings** tab.
5. To run unknown suspicious programs in the Sandbox, in the **DeepScreen** section, click the **Activate** check box.
6. To isolate suspicious files and send info to Avast Threat Labs, in the **CyberCapture** section, click the **Activate** check box, then select a suspicious files check box.
7. Select an option in the **Hardened Mode** box:
  - **Disabled**
  - **Moderate**—Blocks files that have bad or no ratings
  - **Aggressive**—Only chosen executable files with known good ratings are allowed
8. Click **Apply Changes**.
