### **Configuring Avast Business Antivirus Policies: Blocking Email Attachments on Exchange Servers**

**Exchange Server Protection** is available for Servers only, not Workstations.

You can choose to block attachments with certain filename masks. Hackers can mask filenames to make malicious files appear to be safe.

1. Click **Configuration > Policies > Avast Antivirus**.
2. Click the name of a policy.
3. Click the **Server Settings** tab.
4. Click the **Active Protection** tab.
5. Click the **Customize** link in the **Exchange** section.
6. Click the **Blocking** tab.
7. Click the **Enable attachment blocking by name** check box.
8. Type a **filename mask**.
9. Click **Add**.
10. Repeat steps 8-9 until you have added all the attachment filenames you want to block.
11. To customize the file replaces the attachment, type in the following boxes:
  - **Filename replacement**
  - **Replace with**
12. Click **Apply Changes**.
