
Installing a Script or Automation Package

<https://campus.barracuda.com/doc/90442297/>

You can install a new script or automation package by going to Update Center and selecting a script from the list of new scripts available for install. This list is updated periodically as new scripts are added to the Library.

1. In Service Center, click **Automation > Library**.
2. From the **More Actions** list, select **Get More**.
The **Components** page opens with a list of scripts and automation packages available for installation.
3. Select the check box beside the script you want to install.
4. Click **Install**.
