

## Applying a Monitoring Policy to a Group or Device

<https://campus.barracuda.com/doc/90443646/>

As an alternative to creating **automatic inclusion rules** and adding monitoring policies to services, you can apply a monitoring policy directly to a group or device.

1. In Service Center, click **Configuration > Policies > Monitoring**.
2. From the list of monitoring policies, click the name of the monitoring policy you want to apply to a group or device.
3. Click the **Manual Application** tab.
4. Do one of the following to apply the monitoring policy to a group or device:
  - In the **Applied Groups** area, click **Add**. Filter on the **Group Type**, if desired. Click the group and click **OK**.
  - In the **Applied Devices** area, click **Add**. Filter the list of devices. Select the check box beside the device and click **OK**.
