

Web Activity

https://campus.barracuda.com/doc/90444314/

Permission Required to use this API Endpoint

One of the following permissions is required:

- Email Campaign Can Edit All
- Email Campaign Results Can View All

Get all web activity results

This is all gathered web activity, containing data on which users clicked or otherwise interacted with the phishing exercise.

GET /rest/webactivity/id/afterid?startdate=YYYY-MM-DD&enddate=YYYY-MM-DD

Parameters

Name	Туре	Description
id	Integer	Optional. The Campaign ID. No ID, or an ID of "0" (zero), will return all web activity data. If you are using pagination and do not want to use a Campaign ID, you must use a "0". Do not send to /webactivity/afterid, because the afterid would be treated as the Campaign ID.
afterid	Integer	Optional. Use when Paging is required. Each request now returns the maxIdReturned. Use this value as the afterid to retrieve the next page of records if necessary. See Paging below for more details.
startdate	String	Optional. When set, data older than this date is ignored. YYYY-MM-DD format.
enddate	String	Optional. When set, data newer than this date is ignored. YYYY-MM-DD format.
access_token	String	Set the access token if you have not added it as an Authorization header.

Example Usage

"https://api.phishline.com/phishline_example/rest/webactivity/11"

Web Activity 1 / 20

Paging

Paging is required if the request will return more than 5,000 records. The HTTP status code will be set to **206 - Partial Content**.

To get subsequent pages you must pass the **maxIdReturned** from the current request to the next request as the afterid. Continue to do this until all the rows are returned and the **remainingRowCount** is zero and/or the HTTP status code returned is 200.

Example Usage with Paging

Success Response Example

Note the following values indicate that paging is needed.

- status code changes from 200 to 206
- statusMessage changes from OK to PartialContent
- remainingRowCount changes from zero to greater than zero

```
HTTP/1.1 200 0K
{
    "status": 200,

Success 200

Name	Туре	Description
webactivity	Object[]	A web activity record for a single email address / campaign combination.
webactivity.outboundid	Number	The outbound record id.
webactivity.actionType	String	A summary description of the web activity. If a single activity falls in multiple types, the system assigns to most specific.
webactivity.actionPageView	Boolean	Clicked on a link.
webactivity.actionImageView	Boolean	Performed an action image view.
webactivity.actionFileDownload	Boolean	Performed an action file download.
webactivity.actionLoginForm	Boolean	Submitted a login form.
webactivity.actionLoginAuthorized	Boolean	Submitted a login form with both a user and password.
webactivity.actionUser	Boolean	Submitted a user field on a login form.

Web Activity 10 / 20

webactivity.actionUserValue	String	User value submitted on the login form. Blank or "N/A" indicated the user did not enter a value.
webactivity.actionPw	Boolean	Submitted a password on a login form.
webactivity.actionLoginCustom	Boolean	A value was entered in the login form text field.
webactivity.actionLoginCustomValue	String	The value entered in the login form text field.
webactivity.actionFeedbackForm	Boolean	Submitted a feedback form.
webactivity.actionTopic	Boolean	
webactivity.actionSender	Boolean	
webactivity.actionMessage	Boolean	
webactivity.actionFileUpload	Boolean	Uploaded a file to a form.
webactivity.actionFileUploadName	String	user value submitted in a file upload.
webactivity.actionCaptcha	Boolean	Submitted an image captcha form.
webactivity.actionCaptchaAuthorized	Boolean	Submitted a non-blank response on a captcha field.
webactivity.actionUnsubscribePageView	Boolean	Clicked an unsubscribe page.
webactivity.actionUnsubscribeForm	Boolean	Submitted an unsubscribe form.
webactivity.actionUnsubscribeFormValue	String	The value submitted in an unsubscribe form.
webactivity.actionSmartAttachment	Boolean	Performed a smart attachment open or link click.
webactivity.actionSmartAttachmentType	String	If available, the type of smart attachment that was initiated to get to the landing page.
webactivity.os	String	The operating system as reported by the browser.
webactivity.httpUserAgent	String	The HTTP user agent as reported by the browser.
webactivity.httpReferer	String	The HTTP referer as reported by the browser.
webactivity.remoteAddr	String	The remote address as reported by the browser.
webactivity.clientIPAddr	String	The IP address of the client machine.
webactivity.clientPCName	String	The name of the client machine.
webactivity.clientUserName	String	The user name logged into the client machine.
webactivity.clientAdmin	Boolean	The client PC user has administrator rights.

Web Activity 11 / 20

webactivity.pageViewElapsedTimeInSeconds	Number	The total number of seconds this page was detected as being open in the browser, only applies when activity is for Page View.
webactivity.remoteAddrHostName	String	The DNS host name derived from the users IP address.
webactivity.remoteAddrOrganization	String	The organization name derived from the user's IP address.
webactivity.remoteAddrCountryName	String	The country name derived from the users IP address.
webactivity.remoteAddrStateCode	String	The state code associated with this IP address.
webactivity.remoteAddrStateName	String	The state/region name associated with the IP address.
webactivity.remoteAddrCityName	String	The city name associated with the IP address.
webactivity.remoteAddrLatitude	String	The latitude associated with the IP address. This is NOT from the user's GPS – it is likely from the ISP.
webactivity.remoteAddrLongitude	String	The longitude associated with the IP address. This is NOT from the user's GPS – it is likely from the ISP.
webactivity.remoteAddrISPName	String	The Internet Service Provider (ISP) associated with the IP address.
webactivity.remoteAddrNetSpeed	String	The network type reported based on the IP address.
webactivity.remoteAddrUserType	String	The user type based on the IP address.
webactivity.remoteAddrAccuracyRadiusKM	Number	The approximate accuracy for the IP address latitude/longitude. This is NOT from the users GPS - it represents the ISP.
webactivity.serverName	String	The server name.
webactivity.requestMethod	String	The request method.
webactivity.requestURI	String	The request URI.
webactivity.requestTime	Date	The request date and time.
webactivity.requestTimeZoneActual	DateTime	The date/time of the request (converted to actual timezone).
webactivity.requestTimeZoneActualText	String	The date/time of the request (with full actual timezone text).
webactivity.requestDate	Date	The request date.
