

## Office 365 Groups Deployment

<https://campus.barracuda.com/doc/91982417/>

This article applies to Barracuda Cloud-to-Cloud Backup and Microsoft Office 365 Groups.

Depending on the plan and version of Office 365 you are running, some configuration settings may have a slightly different setup path.

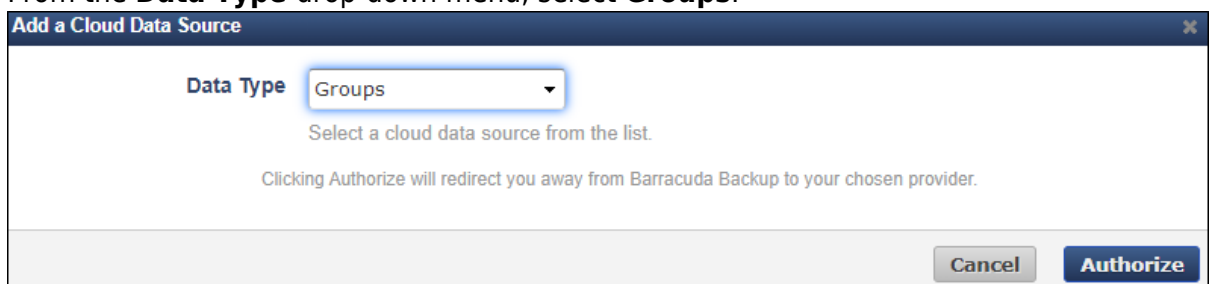

### Configure an Office 365 Groups Data Source

Use the following steps to set up Groups backup:

1. Log into Barracuda Backup, and select the Cloud Source in the left pane.
2. In the **Status** page, click **Groups**:

3. The **Data Sources** page displays. Click **Add a Cloud Provider**, and enter the following details:
  1. In the **Cloud Provider description** field, enter a name to represent the data source.
  2. From the **Cloud Provider type** drop-down menu, select **Microsoft Office 365**.
  3. Click **Save**.
4. The **Add a Cloud Data Source** dialog box displays:
  1. From the **Data Type** drop-down menu, select **Groups**.

A dialog box titled "Add a Cloud Data Source" with a close button (X) in the top right corner. It contains a "Data Type" label and a dropdown menu with "Groups" selected. Below the dropdown is the text "Select a cloud data source from the list." and a note: "Clicking Authorize will redirect you away from Barracuda Backup to your chosen provider." At the bottom right, there are two buttons: "Cancel" and "Authorize".

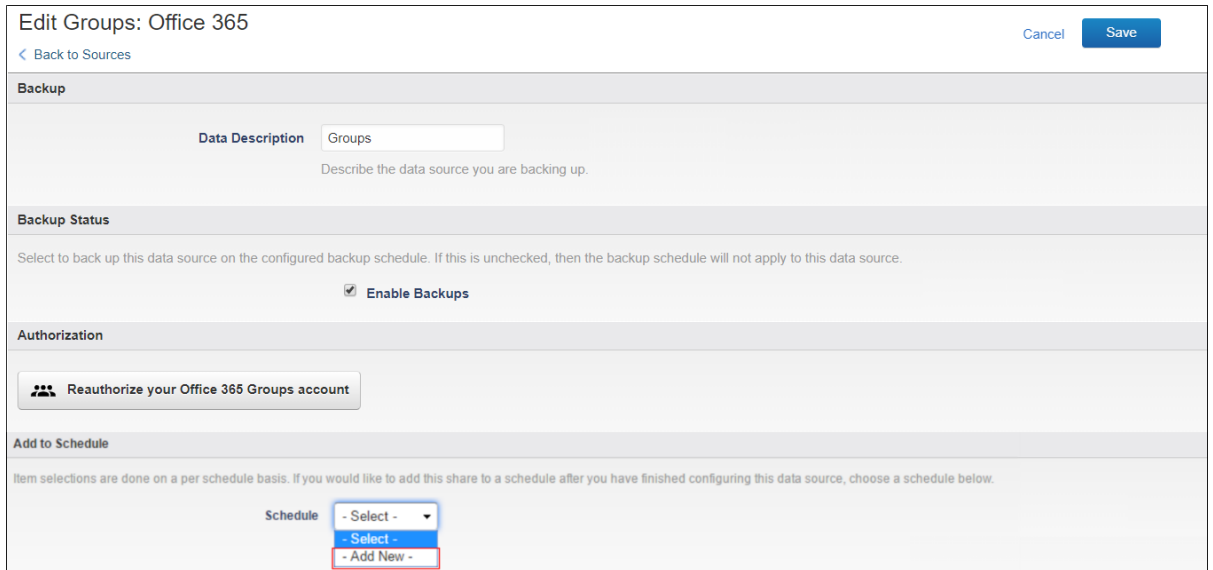

2. Click **Authorize**.

If you are not currently logged in to your Office 365 account, the Microsoft login page displays. Enter your administrator login information, and then click **Sign in**.

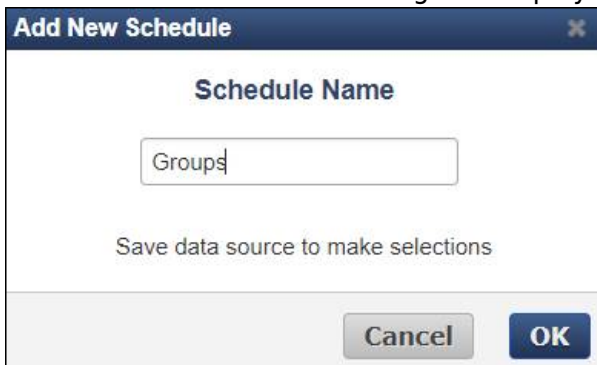

5. In the Groups page, click **Accept** to authorize Barracuda to back up data from Groups:

6. The **Edit Groups** page displays. Complete the following:
  1. Enter a name to identify the data source in the **Data Description** field.
  2. In the **Add to schedule** section, click the drop-down menu, and then click **Add New**:

7. The **Add New Schedule** dialog box displays. Enter a name to represent the schedule:

8. Click **OK**. The **Edit Groups** page is updated with the new schedule name.
9. Click **Save**. The **Edit Backup Schedule** page displays.
10. In the **Items to Back Up** section, select individual items to back up, or click **Select all** to back up everything in Groups.
11. In the **Schedule Timeline** section, select the day you want the schedule to run.
12. In the **Daily Backup Timeline**, specify the time of day the schedule is to run:

### Edit Backup Schedule: Groups

[Back to Schedules](#) Cancel Save

**Schedule name**

A label to identify this backup schedule. A useful label may include information such as the type of data being backed up.

Schedule name

**Identify the data sources**

 Set up each SharePoint data source on a separate schedule for optimal performance.

Identify data sources to back up with this schedule. Unselect the checkbox to display a list of all available data sources from which individual ones can be selected.

Select all

Customize

- Office 365 Demo
  - Exchange Online - 0 users selected
  - OneDrive - 0 users selected
  - SharePoint Online
  - Groups

**Schedule Timeline**

The days on which this backup schedule is to run. In general, backups should be run on each day when the data may change.

- Sunday
- Monday
- Tuesday
- Wednesday
- Thursday
- Friday
- Saturday

**Daily Backup Timeline**

Set the time at which backup runs begin (24-hour time format). Select **repeat** to schedule multiple backups on the same day.

Start time  :

Repeat

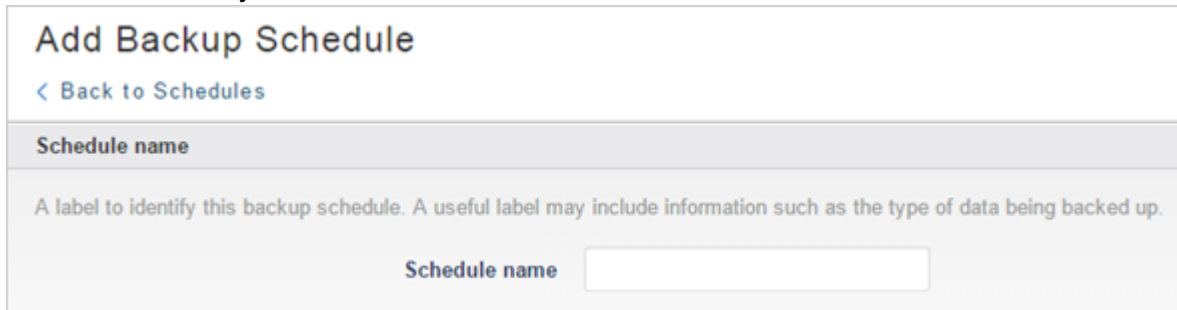

13. Click **Save**. Groups is backed up based on your data source and schedule settings.

## Schedule a Backup

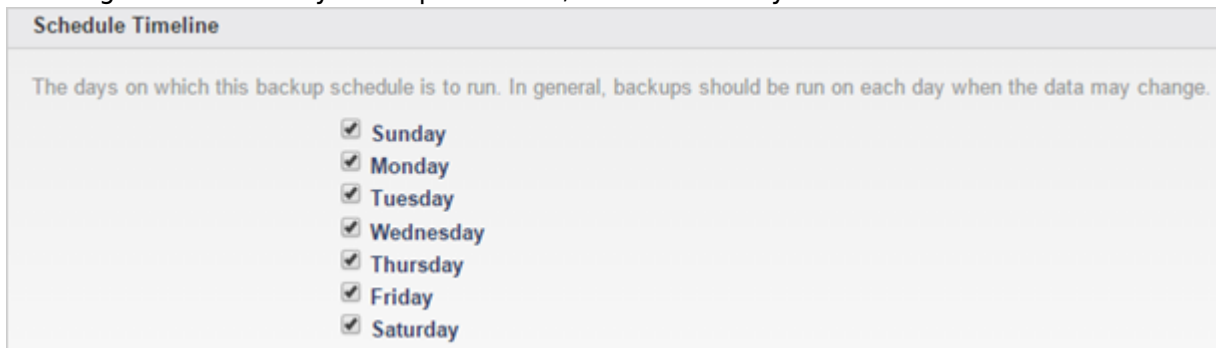

Use the following steps to schedule a backup:

1. Log into Barracuda Backup, and select the Cloud-to-Cloud Backup Source in the left pane.
2. Go to **Backup > Schedules**.

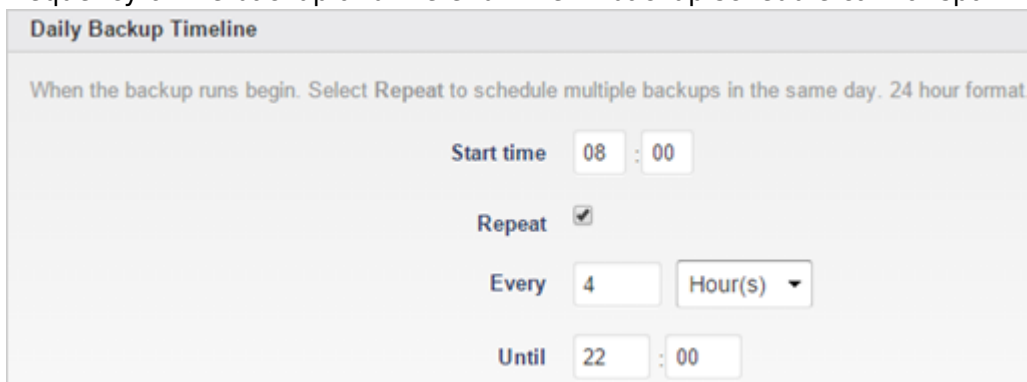

- On the **Schedules** page, click **Add a Schedule** in the upper right-hand corner.
- Enter a name for your schedule in the **Schedule name** field:

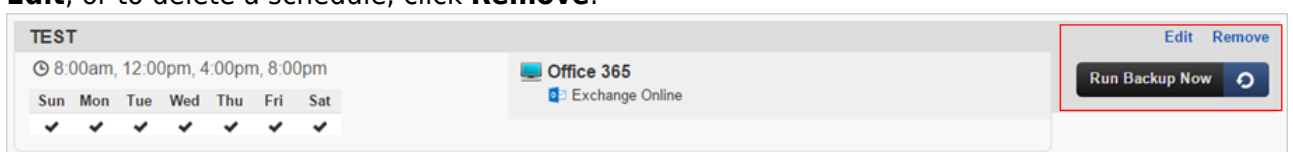

- In the **Identify the data sources** section, select the data to be backed up using this schedule. You can select **Select all** or you can granularly select data down to a specific file or folder.
- In the **Schedule Timeline** section, select the days you want the schedule to run. If you are creating a one-time only backup schedule, deselect all days:

- In the **Daily Backup Timeline** section, enter a **start time** for your backup schedule. To repeat a backup schedule throughout a 24-hour period, select the **Repeat** option and specify the frequency of the backup and the end time. A backup schedule cannot span multiple days:

- Once you have configured your backup schedule, click **Save**.
- The backup schedule is now listed on the **Schedules** page and specifies the days and times that it is to run. To run a backup on-demand, click **Run Backup Now**, to edit the schedule click **Edit**, or to delete a schedule, click **Remove**:
