Question 1 of 50

NEXT >

When is the host firewall ruleset responsible for a packet?

Mark all correct answers.

☐ Every packet must pass the host firewall before being evaluated by the forwarding firewall.

☐ When the destination MAC and IP of a packet matches an IP assigned to the firewall itself.

☐ When a client contacts a server in the DMZ over a bridged interface.

☐ When a packet originates from the firewall to a destination within another network.

After answering all the questions, submit your test by clicking "Finish Exam". This action cannot be undone.
