

Custom Block Page

<https://campus.barracuda.com/doc/92767297/>

When Barracuda WAF-as-a-Service blocks potential visitors from your application, it returns a response that informs the visitor that they have been blocked.

There is a default message that displays automatically. You can use that message as is, modify it, or create a new customized block page.

It is a good idea to preview your block page if you made any customizations.
