

## Log Formats

<https://campus.barracuda.com/doc/92767346/>

You can customize the Web Firewall Logs, Access Logs, and Audit Logs formats sent to the syslog server. You can choose from the predefined log formats (Common Log Format, NCSA Extended Format, W3C Extended Format, or Default), or you can create a custom format. Given below are the steps to specify the custom format.

Depending upon the configuration, an IP address of a service, client IP, or server IP can be either IPv4 or IPv6.
