

Adding a Sumo Logic Cloud Syslog Server

<https://campus.barracuda.com/doc/92767435/>

Perform the following steps to add a Sumo Logic Cloud Syslog server:

1. Go to the **ADVANCED > Export Logs** page.
2. In the **Add Export Log Server** window, specify values for the following:
 - **Name** – Enter a name for the Sumo Logic service.
 - **Log Server Type** – Select **Cloud Syslog Service**.
 - **IP Address or Hostname** – Enter the IP address or the hostname of the Sumo Logic service. For example: *syslog.collection.your_deployment.sumologic.com*
 - **Port** – Enter the port associated with the IP address of the Sumo Logic service. The default port is 6514.
 - **Token** – Enter the token for Sumo Logic service.
 - For
example: *9HFxoa6+IXBmvSM9koPjGzvTaxXDQvJ4POE/WCURPAo+w4H7PmZm8H3mSEKxPI0Q@41123*, where the number "41123" is the Sumo PEN and is included as part of the customer token.
 - **Log Timestamp and Hostname** – Set to **Yes** if you want to log the date and time of the event, and the hostname configured on the **BASIC > IP Configuration > Domain Configuration** section.
 - **Comment** – (Optional) Enter comment about the new setting.
3. Click **Add**.

Sumo Logic provides an app with prebuilt dashboards and visualization for Barracuda WAF events. The Barracuda WAF app is available [here](#).
