

Continuum Integration

<https://campus.barracuda.com/doc/93197027/>

Continuum is the technology industry's only channel-exclusive provider of fully integrated managed services solutions. The SaaS-based platform enables IT solutions providers to efficiently backup, monitor, troubleshoot and maintain desktops, servers and other endpoints for small-and-medium-sized businesses.

Our Continuum integration makes it easier than ever to keep an eye on the data you protect for your clients by offering MSPs an instant response to backup issues as they crop up, so customers don't have to wait for an administrator to notice a backup issue before corrective actions can be taken.

Setup
