

How to Restore an Exchange Online Data Source

https://campus.barracuda.com/doc/93197821/

Performing a restore will not overwrite any current data.

Note the following rules for restoring data from the legacy version of Cloud-to-Cloud Backup to the latest version of Cloud-to-Cloud Backup:

- Data can only be restored to an alternate location; restoring to the original location is not supported.
- Data from the legacy Cloud-to-Cloud Backup is not searchable.
- File counts may not match due to a counting issue.
- Previous non-teams support will only allow restoring of certain components for Groups and only to a new Team.

Use the following steps to restore Exchange Online data:

- 1. Log into https://login.barracudanetworks.com/, and select the Cloud-to-Cloud Backup Source in the left pane.
- 2. Navigate to the **Protect** page from the top navigation menu, and select the **Exchange** data source.

- 4. Select the user mailbox from which to restore data.
- 5. Select the folder from which to restore data and locate the email or folder to restore.

Alternatively, using the search bar, type in a search term. The results with the search term in the subject line are displayed.

Restores (do not overwrite data.						
Where would you like to restore to?							
۲	Original Location						
0	Other Location						
	CANCEL RESTORE						

Selecting **Other Location** will create a new folder called **Restores** in the user mailbox.

- 7. To view the restore status, go to the <u>Reports</u> page.
- 8. Verify the messages or folders have been restored in the user's Exchange Online mailbox.
