[Cancel](#) [Restore](#)

4. Select the **Object-level Restore** radio button.  
The Object-level selection options are displayed.

**What Physical Image Would You Like to Restore?**  
Select from the available revisions and/or volumes to restore by:

☐ Rapid Recovery ☐ VHD/X Files ☒ Object-Level Restore

Select Your Revisions, Volumes, and/or Files and Folders

**Current selection:**

☐ (C:) (Boot) >

Select the items on the left that you want restore.

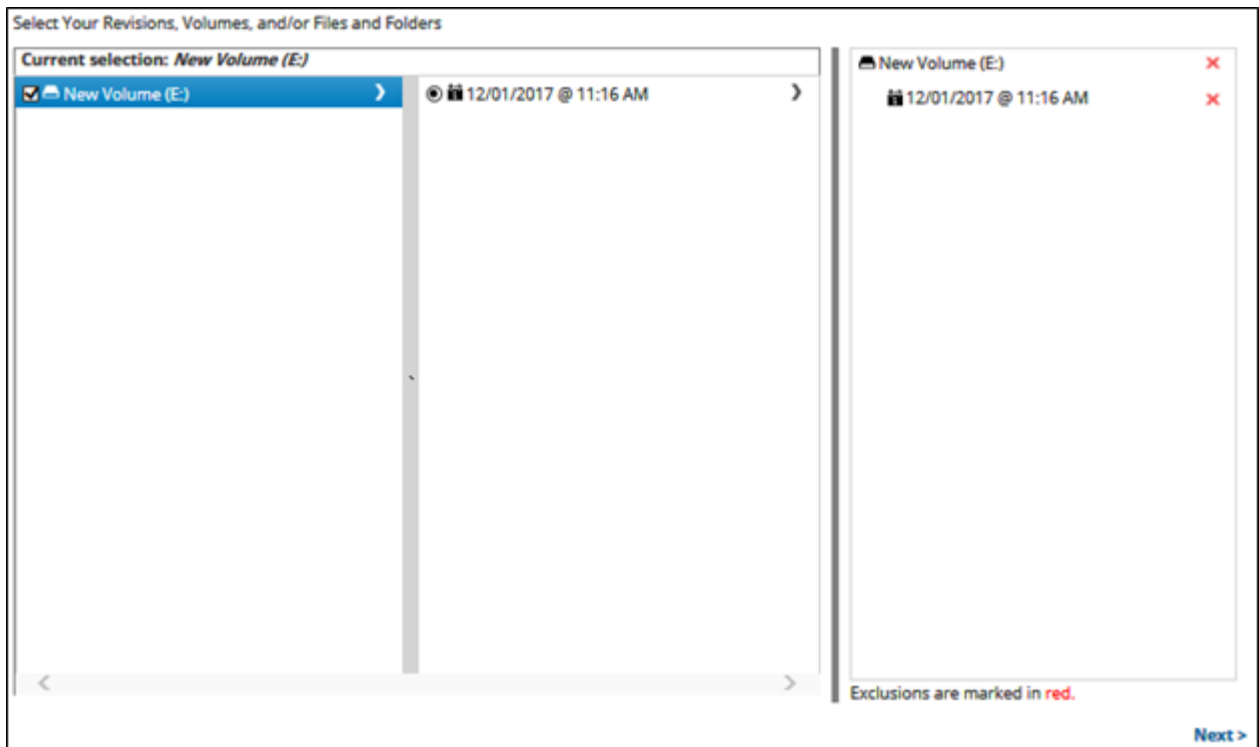

Exclusions are marked in red.

[Next >](#)

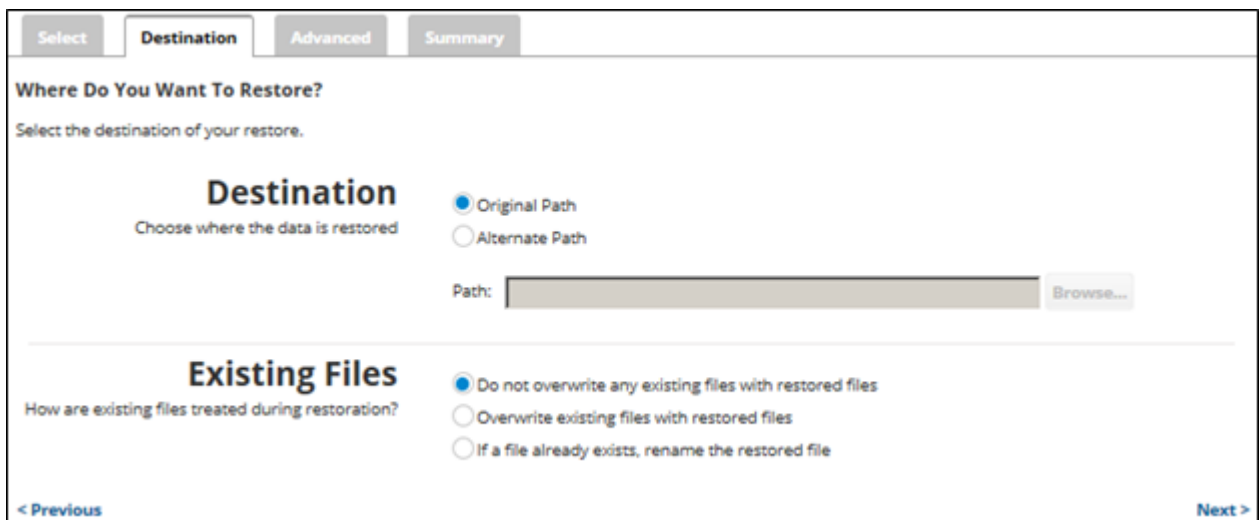

5. In the Current Selection pane, select the revisions/volumes to be restored.

Clicking the arrow  at the right of the items displays more revisions/volumes.

The selection is displayed in the far right pane. Click the remove  icon to remove any selections.

6. Click **Next**.  
The Destination page is displayed.

7. At the Destination section, to select the original destination path, click the **Original Path** radio button.
8. To select an alternate path, click the **Alternate Path** radio button, and then browse to the destination.

### Selecting an Alternate Path

a. Click the Alternate Path radio button.

The following field is displayed.

☒ Alternate Path

Path:

b. Click the Browse button to locate the destination.

The folder options are displayed.

Please select a folder below:

Current selection:

-  Local Disk(C:\) >
-  New Volume(E:\) >

Type network location if it is not listed above (for example, \\server\share):

Path:

c. Select the destination.

The OK button is activated.

d. Click OK.

The address is displayed in the Path field.

☒ Alternate Path

Path:

To add a network location that is not listed, perform the step below.

**Adding a Network Location**

a. To back up files and folders on another network location that is not listed, type the network path address in the Path field as shown in the example below.

Type network location if it is not listed above (for example, \\server\share):

Path:

The add button is activated.

b. Click the add  button.

9. At the Existing Files section, select one of the following radio buttons regarding the restoration of existing files:
- Do not overwrite any existing files with restored files
  - Overwrite existing files with restored files
  - If a file already exists, rename the restored file
10. After making your selections, click **Next**.  
The Advanced page is displayed.

11. Optionally, select the following options to specify the advanced features of the restore:
  - Restore NTFS File Permissions
  - Restore File Attributes
  - Restore Last Modified Date
12. Click **Next**.  
The Summary page is displayed.

13. Verify your selections, and then click the **Restore** button.  
The confirmation pop-up is displayed.

14. Click **Yes**.  
The Restore Selections page is displayed with the status.
