Reports

The **Reports** page provides a detailed report for each backup, export, or restore job that is run. In addition, any processes currently running displays. Reports include details such as error or warning status, data source, type of job, when the job started, size, and the number of new or removed items.

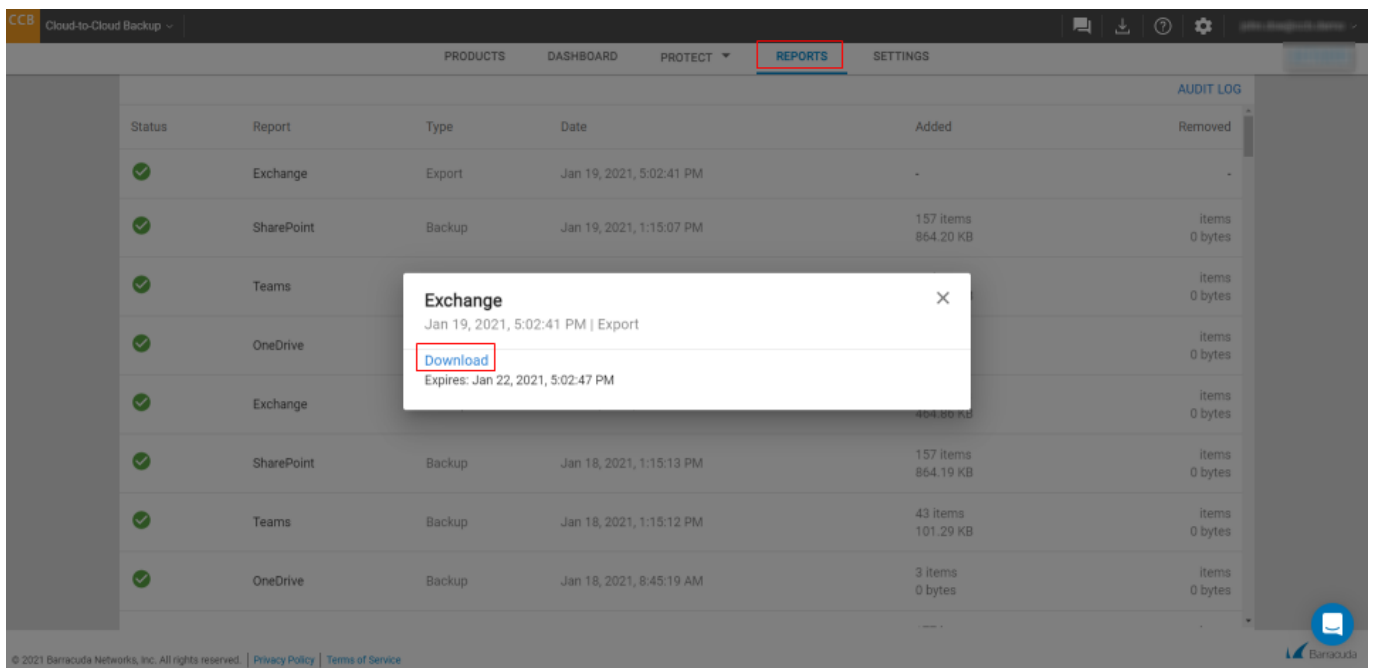

Click on any of the items to see the status and details of the backup, export, or restore job.

Audit Log

The Audit Log displays a report of all activities in Barracuda Cloud-to-Cloud Backup by user, IP address, time, and description. Logged activities include log on authentication, changes to settings, changes to account information, when a backup, restore, or export job started, and more.

Click the calendar for log activities that occurred on a specific day.

The screenshot displays the Barracuda Cloud-to-Cloud Backup (CCB) interface. A modal window titled "Audit Log" is open, showing a table of system events for the date "Jan 13, 2021". The table has four columns: "User", "IP Address", "Time", and "Description". The background interface shows a list of backup jobs with green checkmarks in the "Status" column. On the right side, there is a sidebar with an "AUDIT LOG" section and a "Removed" section showing "items 0 bytes".
