

About Software Installation

<https://campus.barracuda.com/doc/93198103/>

Prerequisites: After you have created an account and added computers to the account, you can start downloading and installing the backup agent software by:

- Downloading the backup agent software, and then installing the backup agent software.
- Creating a custom backup agent installer, and then installing the backup agent software.

You can also deploy the backup agent software with a remote monitoring and management (RMM) tool.

A custom backup agent installation allows you to configure the backup agent's settings from the Management Portal.
