

## Deploying the Backup Agent Software with RMM Tool

<https://campus.barracuda.com/doc/93198409/>

After you have downloaded the installer, you can deploy it with RMM tools such as:

- Kaseya
- Level Platforms
- N-able
- Avast

To deploy the backup agent software with RMM, use the command line switches in the following table.

Command Line Switch	Description
/Username=user_test	Specifies the username to be used during Monitor setup - only for new accounts.
/Password=1234567	Specifies the password to be used during Monitor setup - only for new accounts.
/ComputerID=0000	Specifies the Computer ID to be used during Monitor setup - only for new accounts.
/ManagedKey	If added, managed key will be used during Monitor setup - only for new accounts.
/Silent	Runs the installer in silent mod. User interaction is not required.
/SuppressMsgBoxes	Combined with /silent, suppresses setup message boxes.
/VerySilent	Does not display any software message boxes or screens unless errors are encountered.

All parameters are case sensitive.
