
DHCP Service

<https://campus.barracuda.com/doc/93198586/>

DHCP (Dynamic Host Configuration Protocol) allows you to automatically assign IP addresses and other network configurations to network clients. Each site device can be configured through the [Cloud Web UI](#) to assign IP addresses to clients connected to its LAN ports. Barracuda CloudGen WAN allows you to restrict the assignment of IP addresses only to devices that are known with their MAC address.
