

Identity Provider

<https://campus.barracuda.com/doc/93201532/>

The CloudGen Access Console supports configuring [SAML](#) and [OIDC](#) as identity providers for enrolling devices.

By default, all CloudGen Access tenants come configured with an email-backed internal identity provider. This provider requires no configuration and will simply send an email to the configured user email address, with a secure link the user must click, as a form of authentication.
