

Barracuda Managed Workplace Integrated Avast Antivirus Client 20.7

<https://campus.barracuda.com/doc/93880519/>

These release notes document recent upgrades and bug fixes in Avast Antivirus related to the Barracuda Managed Workplace integration.

This update requires a reboot.

Improvements

- **Improved Firewall** - Firewall is now more stable.
- **Coronavirus scam protection** - Avast continues to protect you against phishing scams, including ever-increasing COVID-19 scams and malware.
- **Improved Wi-Fi Inspector** - Wi-Fi Inspector is updated for stability.
- **Safer web browsing** - Web Shield can now block malicious sites based on site certificates.
- **Firewall compatibility** - Avast Firewall is now compatible with the Microsoft Wireless Display adapter.
- **Improved taskbar icon** - Scan progress is now visible from the Avast taskbar icon.
- **Improved activation process** - Better internal tracking of license activation errors.
- **Fixed Rescue Disk** - You can now use Rescue Disk again to restore your PC from advanced attacks.
- **Improved product stability.**
- **Behavioral shield improvements.**

Resolved issues

- Resolved an issue that displayed a "Timeout waiting for Policy to Apply to Device" error on the Devices needing AV install page in Service Center.
- Resolved an issue where out of date Avast virus definition files were kept in error.
- Improved security for URL exclusions.
- Improved stability for minor crashes and internal stability.
- Improved leak handling.
- Fixed heap corruption.
- Resolved tray icon misbehavior when enabling/disabling components.
