

Barracuda Managed Workplace CloudCare Agent 4.23

<https://campus.barracuda.com/doc/93880522/>

These release notes document the resolved issues in Barracuda Managed Workplace CloudCare Agent 4.23.

This update requires a reboot.

Resolved Issues

- Resolved an issue where the AvastTrayApp.exe threw an Entry Point Not Found error during startup.
- Resolved an issue where the word "Avast" appeared in the AVG Agent restart dialog.
- Resolved an issue where Setup.exe loaded libraries from the wrong directory.
- Resolved an issue where ClientManager.exe crashed unexpectedly on a regular basis.
- Resolved an issue where an interrupted install left antivirus behind.
- Resolved an issue where the wrong version of antivirus was installed and launched mid-installation.
- Resolved an issue where the CloudCare agent tried to install antivirus multiple times.
- Resolved an issue where the out-of-date definitions alert was triggered early.
- Resolved an issue where repeated antivirus installation failed when the system was not rebooted.
- Resolved an issue where the AvastTrayApp did not restart.
- Resolved an issue where a Scan Overdue message did not trigger if the device was off during the reporting period.
- Introduced compatibility with Windows Server 2019.
- Resolved an issue where antivirus was reinstalled even if the version was already current when the CloudCare agent upgraded.
- Resolved an issue where the tray icon was invisible after Explorer was reloaded.
