## CloudGen Access Console Release Notes

<https://campus.barracuda.com/doc/93881078/>

### Version 2.23.0

---

Release Date 2024.06.04

- Fixed an issue where the login details for the Welcome Form from Barracuda Cloud Control in the United States data host region is empty. [BNCGA-5897]
- Fixed an issue where MSP customer accounts did not display when there are no users configured.

### Version 2.21.0

---

Release Date 2024.04.26

- Fixed an issue where the wizard was prompting for login credentials when changing regions.
- Fixed an issue where the wizard was not present for an MSP customer during tenant creation.
- Updated Top use cases in the **Overview > Getting Started** page.
- Fixed issue where deleting a device fails but there was no error message.
- Fixed issue where the Done button is toggled every time user clicks on Copy token.

### Version 2.20.0

---

Release Date 2024.04.04

- Fixed issue where enrollment was failing.
- Disabled Action button for enrollments when count is 0.
- Display proper error when port numbers are out of bounds while creating resources.
- Fixed display of Top Overview card.
- Added validation to re-authentication field to be positive numeric numbers.

### Version 2.19.0

---

Release Date 2024.03.28

- Fixed issue where user cannot change user web policy to "Everyone" policy.
- Fixed issue where user cannot disable a local user.
- Use marketplace subscription information as expected .

## Version 2.18.0

---

Release Date 2024.03.13

- Fixed bug that occurred when clicking on filters on UD dialog [ BNCGA-5636] .
- Switching between IP and host resource should clean up [ BNWSS-15589].
- Fixed bug with Microsoft authentication looping [BNCGA-5453].

## Version 2.16.0

---

Release Date 2023.12.21

- New feature 'Manage tenant' in Tenants drop-down in the app enables users to upload a logo (avatar) and view Tenant Name, Tenant ID, and Serial Number.
- New Serial Activation Flow on License page.
- Fixed issue where *Everyone* toggle was not honored under **Access > Policy Detail**.
- Fixed user enrollment copy url on mobile.
- Fixed enrollment creation and email delivery.
- Fixed issue when loading a user with no enrollments.

## Version 2.15.0

---

Release Date 2023.11.22

- New **Device Classification** feature allows IT administrators to classify end user devices as *Personal*, *Managed*, or *Supervised* in order to better manage and secure corporate devices. See [Device Classification](#) and [How Device Classification Works](#) for details.
  - Apply policies based on the device classification.
  - Web policies also support device classification criteria.
- Added device hostname to the device details.
- Display Access Policy names on the list of Access Resources.
- New UI for the User Directories list.
- Allow new resource hosts for M365 customers:
  - \*.aadg.akadns.net
  - \*.aadg.trafficmanager.net

---

## Fixed:

- Old agent count on the Device Policy page.
- Some of the page's placeholders.
- Issue with the Threats section without enrolled devices.
- Token being lost when creating a new tenant while switching between clusters.
- Let connector know when an Azure authentication error happens.
- Prevent potential errors when creating a new web policy.
- Small UI fixes across the app.

## Version 2.6.0

---

- Tamperproof feature - Provides the option to protect against unauthorized or accidental tampering with the app installation, security policy, and app settings on endpoints. When enabled, this feature hides the Quit, Un-enroll and Stop/Start options on the CloudGen Access App. See [Tamperproof](#) for details and OS support.
- New **Moderator** role - Has access to all APIs except for the User, Groups, and Administrator API (cannot add, modify, or remove users, groups or admins).

## Version 2.2.1

---

- Support for the new cloud-based User Directory refresh token system.

## Version 2.1.27

---

Release Date 2023.05.02

## Web Filtering Alerts

- Provides the ability to receive email alerts based on configured web policies.
- Ability to configure based on severity (high, medium, low) with provided threshold.
- Options to globally disable alerts based on severity.  
See [Configure Alerts](#) for details.

## Fixes and Updates

- OAuth2 flow replaces OAuth flow for Microsoft Azure user directories . Authorization happens when you add a user directory and click **Authorize** in the UI.

- 
- Fixed login problem when an Admin user was created with any of the following roles, using *Password* for Authentication Type:
    - Enrollment
    - Read Events
    - Device
    - Device (Read Only)
  - Fix: Running the access-cli filter `access-cli records watch -r 30 --detailed-info -o json` works as expected without errors.

### Version 1.3.18:

---

- Fixed Okta API issue where users could not be pulled successfully.
- Fixed Google Apps issue where users would be randomly re-enrolled.
- OAuth2 flow replaces OAuth flow for Google Workspace user directories since Google deprecated OAuth out-of-band (OOB) flow in October, 2022. Authorization happens when you add a user directory and click **Authorize** in the UI.

### Version 1.3.1

---

Release Date 2022.02.17

- Improved user list API times.

### Version 1.3.0

---

Release Date 2022.02.16

- Added [App Catalog](#).
- Added warning to users when they try to delete a resource that are being used as a DNS on **Settings -> Agent DNS**.
- Fixed various issues.

### Version 1.2.16

---

Release date 2021.10.25

- Fixed minor issues.

## **Version 1.2.15**

---

Release date 2021.10.17

- Fixed minor issues.

## **Version 1.2.14**

---

Release date 2021.10.04

- Fixed minor issues.
- Added new status and error messages to User Directories sync info.

## **Version 1.2.13**

---

Release date: 2021.09.27

- Create new enrollment automatically when sending enrollment email to multiple users.
- Send emails from `access.barracuda.com`
- Connector UI Improvements.
- Fixed various issues.

## **Version 1.2.12**

---

Release date: 2021.09.20

- Removed devices security session.
- Increased max concurrent admin logins.
- Fixed various UI issues.

## **Version 1.2.11**

Release date: 2021.09.13

- Fixed various issues.

### **Version 1.2.10**

---

Release date: 2021.09.06

- Fixed various issues.

### **Versions 1.2.6, 1.2.7, 1.2.8,1.2.9**

---

Release date: 2021.08.31

- Agent DNS - Added DNS over Resource.
- Agent DNS - Added option to configure more than one domain suffix.
- Added search to Groups.
- Improved UD syncing logic.
- Fixed various issues.

### **Version 1.2.5**

---

Release date: 2021.08.19

- Fixed various issues.

### **Version 1.2.4**

---

Release date: 2021.08.17

- Fixed various issues.

## **Version 1.2.3**

---

Release date: 2021.07.21

- Fixed various issues.

## **Version 1.2.2**

---

Release date: 2021.07.15

- Fixed various issues.

## **Version 1.2.1**

---

Release date: 2021.07.13

- Fixed various issues.

## **Version 1.2.0**

---

Release date: 2021.07

- Agent DNS - Improved DNS settings.
- Agent Customization - Added certificate expiration time option.
- Added OneTrust consent modal.
- Removed phone number from user modal.
- New resource Ports Configuration UI.
- Fixed various issues.

## **Version: 1.1.25**

---

Release date: 2021.07.08

- Added UDP support.

- Implemented fixed IP resources.
- Implemented wildcard exceptions.

### **Version: 1.1.20**

---

Release date: 2021.06.07

- Added admins management.

### **Version 1.1.8**

---

Release date: 2021.03.24

- Several bug fixes and performance improvements.

### **Version 1.1.7**

---

Release date: 2021.03.22

- [Firefox] Fixed login autocompletion.
- Added device certificate to device details.
- Several bug fixes and performance improvements.

### **Version 1.1.6**

---

Release date: 2021.03.11

- Fixed tenants selector loading.

### **Version 1.1.5**

---

Release date: 2021.03.08

- Record data now gets uploaded to external server (SIEM configuration).

- Several bug fixes and performance improvements.

### **Version 1.1.4**

---

Release date: 2021.03.06

- Several bug fixes and performance improvements.

### **Version 1.1.3**

---

Release date: 2021.03.04

- Several bug fixes and performance improvements.

### **Version 1.1.2**

---

Release date: 2021.03.02

- Several bug fixes and performance improvements.

### **Version 1.1.1**

---

Release date: 2021.03.02

- Several bug fixes and performance improvements.

### **Version 1.1.0**

---

Release date: 2021.02.22

- Implemented authentication flow for SSO AuthDB.
- Added loading indicator to console login.
- Fixed bug where logging in using Google SSO in Safari did not redirect to dashboard.
- Several other bug fixes and performance improvements.

## **Version 1.0.2**

---

Release date: 2021.01.26

- Fixed slow device deletion.
- Fixed access\_resources API to return 403 when token is not valid.

## **Version 1.0.1**

---

Release date: 2021.01.18

- Created debug menu on console.
- Added IT support contact option to support settings.
- Several other bug fixes and performance improvements.

## **Version 0.12.0**

---

Release date: 2020.10.23

- Added support for Admin roles.
- Removed old revoke\_enrollment API.

## **Version 0.11.7**

---

Release date: 2020.10.20

- Updated Device metadata database.
- Now uses proper responses to DELETE verbs.
- Removed RbacLegacy dead code.
- Fixed several eager loading warnings.

## **Version 0.11.5**

---

Release date: 2020.09.15

- Added support for wildcards on wildcard exceptions.

### **Version 0.11.2**

---

Release date: 2020.09.08

- Added support for wildcard exceptions.

### **Version 0.10.36**

---

Release date: 2020.08.19

- You can now find devices by device\_id and enrollment\_id

### **Version 0.10.34**

---

Release date: 2020.08.07

- Added evaluate\_policy method to Device API.

### **Version 0.10.27**

---

Release date: 2020.06.26

- Added email-backed SSO.

### **Version 0.10.23**

---

Release date: 2020.06.19

- Added support for multiple Microsoft Azure directory tenants.

## **Version 0.10.20**

---

Release date: 2020.06.05

- Added SSO support to Admin login.

## **Version 0.10.1**

---

Release date: 2020.02.10

- Added support for resources with wildcard domains and port ranges.
- Added password reset flow.
- Several bug fixes and performance improvements.

## **Version 0.9.12**

---

Release date: 2020.01.14

- Improved the UI/UX on the device details page.
